

Social Partners Study – Project Update

Research ongoing by consultants at Syndex towards mid term report (by Q1 2022).

This is focused on the following points:

- Breakdown of gas sector employment per country for all Member States and UK including diversity in demographics.
- Identification of the companies in the sector in those geographies.
- Identification of their business area(s) i.e. DSO / TSO / digital solutions / electrolyzers / hydrogen / anaerobic digestors / biomethane / district heating / power generation / energy storage / CCS / heating appliances / gas turbines / smart grids or smart meters etc.
- Trends that can be identified in employment over the last 5-10 years and projected evolution of the sector.
- Mapping of unionization rates, collective bargaining coverage and which unions are most important in each country.
