Health surveillance for silicosis:	95% of Employees requiring it are covered (vs. 89% in 2008)
Training	<ul style="list-style-type: none">• General training: 84% (+23% Employees)• Training on task sheets: 57% (+43% Employees)

NEPSI Council:

“In 2010, four years after signature, the application of the Agreement is well under way, improves continuously and already demonstrates concrete results.”

NEPSI Council Conclusions

- ④ **More multisectoral national workshops to present the SDA in the line of the two 2010 events**

- ④ **The NEPSI Reporting task force to:**
 - **harmonise remaining interpretation issues**
 - **investigate lower results for the training on specific task sheets**

- ④ **Special NEPSI Council meeting for recommendations on how to measure the effectiveness of the SDA application.**

- ④ **The NEPSI Employers to include more information on R&D projects made in the area of exposure to RCS in the next Summary Report.**
