1 Introduction

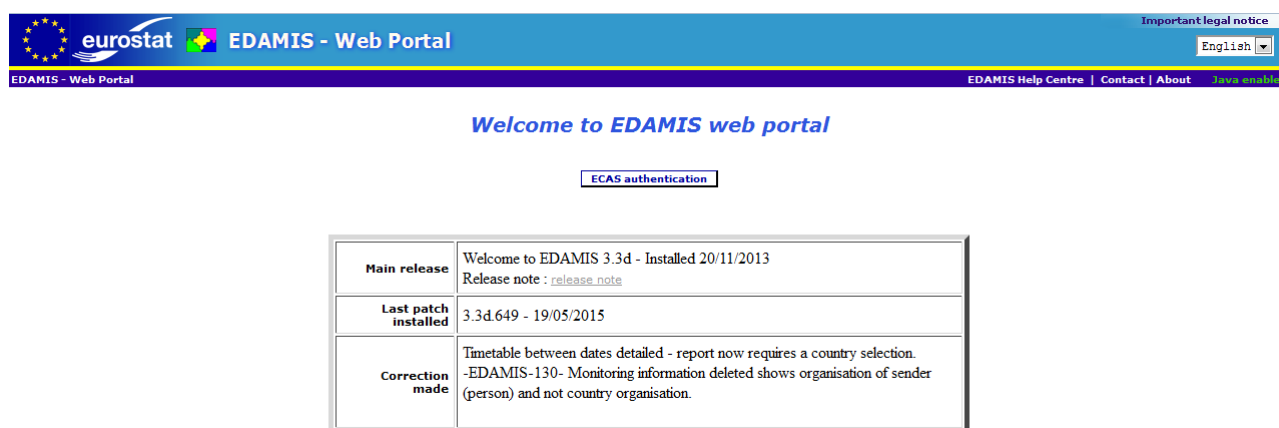

The EDAMIS Web Portal (EWP) is a web based application which allows the exchange of data files mainly between Eurostat and statistical organisations in the EU and offers control and reporting functions to manage the dataset inventory and monitor the data transmissions. EWP functionalities are accessible according to the user's profile.

This quick user guide explains how you can access EDAMIS and become a data sender. It guides you through the basic steps from the registration to data transmission and to the monitoring of data files traffic.

2 Connection to EDAMIS

Use the following address to connect to the EWP → <https://webgate.ec.europa.eu/edamis>.

On the 'Welcome' page log in using the EC Authentication System. When you click on the "ECAS authentication" button the application will check if you are already authenticated (Figure 1).

Main release	Welcome to EDAMIS 3.3d - Installed 20/11/2013 Release note : release note
Last patch installed	3.3d.649 - 19/05/2015
Correction made	Timetable between dates detailed - report now requires a country selection. -EDAMIS-130- Monitoring information deleted shows organisation of sender (person) and not country organisation.

Figure 1 – EWP login page

If you are, the main page of EDAMIS will appear. Otherwise you will be redirected to the ECAS login page (Figure 2). Make sure that the selected domain is "External". If not, click on "Change it".

There are three possibilities:

- You have an ECAS account;
- You have an ECAS account (but forgot your password);
- You do not have an ECAS account yet.

Figure 2 - ECAS login page

→ You have an ECAS account

Fill in the login page: username (with the username or the mail address) and password, then click on the "login" button.

→ You have an ECAS account, but forgot your password

If you forgot your password or wish to obtain a new one, click on the link "Lost your password?" or the link "New password" at the top (Figure 2).

In order to obtain a new password, fill in the "New password" page: username (or email address) and the CAPTCHA security code.

You will receive an email with instructions to enter your new password.

→ You do not have an ECAS account yet

Create an ECAS account in order to use EDAMIS. Click on "Not registered yet" or the link "Sign Up" at the top. Fill in the "Sign up" page: username, first name, last name, email and the CAPTCHA security code.

Once the account is created in ECAS, you will receive an email "ECAS Password Initialization" with instructions to enter your password (with a time limit of 90 minutes). Now you may go back to EDAMIS and log in.

3 Self-registration in EDAMIS

When you log in to the EWP for the first time, you have to complete the "Self Registration Request" form and request rights on datasets of interest to you. You can ask for Sender, Receiver, Informed or Data preparer (Web Forms only) rights, but most users need Sender rights. The request is then accepted (or rejected) by the Transmission Coordinator¹ in your organization or the Domain Managers in Eurostat and you will receive an email with the result. The next steps describe how to perform the self-registration in the EWP.

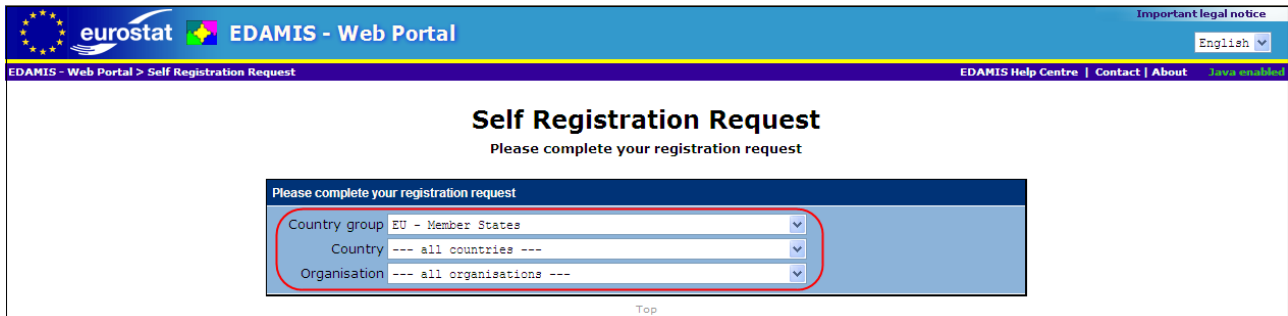

¹ The Transmission Coordinator (TCO) is responsible for coordinating data transmission issues in your organisation.

3.1 Connect to the EDAMIS portal

As explained in Chapter 2, go to “ECAS Authentication” then sign in with your ECAS account and password.

3.2 Fill in the EDAMIS self-registration request form

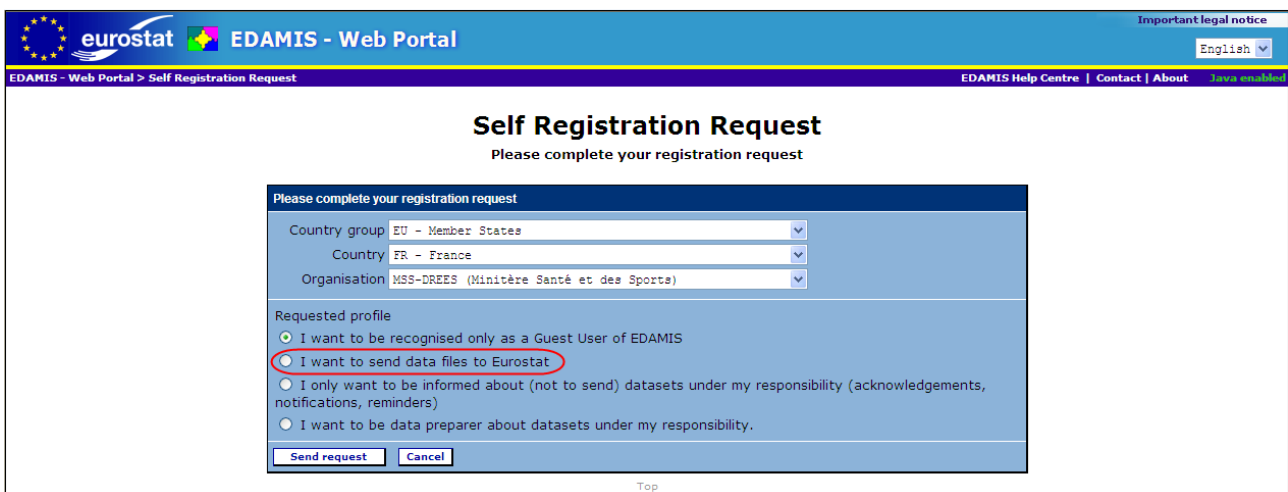

The EWP invites you to start the registration by selecting your country group, country and organisation (Figure 3).

The screenshot shows the 'Self Registration Request' page of the EDAMIS Web Portal. The page has a blue header with the Eurostat logo and 'EDAMIS - Web Portal'. Below the header, there's a navigation bar with links like 'EDAMIS - Web Portal > Self Registration Request', 'EDAMIS Help Centre', 'Contact', and 'About'. The main content area is titled 'Self Registration Request' and 'Please complete your registration request'. A form box contains three dropdown menus: 'Country group' (set to 'EU - Member States'), 'Country' (set to '--- all countries ---'), and 'Organisation' (set to '--- all organisations ---'). A red circle highlights these three dropdowns. At the bottom of the form box, there is a 'Top' link.

Figure 3 – Starting the self-registration in the EWP

Select the option “I want to send data files to Eurostat” (Figure 4).

The screenshot shows the 'Self Registration Request' page, specifically the 'Requested profile' section. The form box contains the same dropdowns as in Figure 3, but now they are populated: 'Country group' is 'EU - Member States', 'Country' is 'FR - France', and 'Organisation' is 'MSS-DREES (Ministère Santé et des Sports)'. Below these, the 'Requested profile' section has four radio button options. The second option, 'I want to send data files to Eurostat', is selected and circled in red. The other options are: 'I want to be recognised only as a Guest User of EDAMIS', 'I only want to be informed about (not to send) datasets under my responsibility (acknowledgements, notifications, reminders)', and 'I want to be data preparer about datasets under my responsibility.'. At the bottom of the form box, there are 'Send request' and 'Cancel' buttons. A 'Top' link is also present at the bottom of the page.

Figure 4 – Selecting the 'sender' profile

The form automatically refreshes and allows you to select the domain(s) and/or dataset(s) for which you are the sender.

Select the domain(s) and/or dataset(s) you want to transmit (Figure 5).

Self Registration Request

Please complete your registration request

Please complete your registration request

Country group: EU - Member States

Country: FR - France

Organisation: MSS-DREES (Ministère Santé et des Sports)

Requested profile

☐ I want to be recognised only as a Guest User of EDAMIS
☒ I want to send data files to Eurostat
☐ I only want to be informed about (not to send) datasets under my responsibility (acknowledgements, notifications, reminders)
☐ I want to be data preparer about datasets under my responsibility.

Domains/Datasets related to the specified organisation

<input type="checkbox"/> EHIS European Health Interview Survey (all active datasets linked to his organisation)	+
<input type="checkbox"/> ESSPROS European Social Protection Statistics (all active datasets linked to his organisation)	+
<input checked="" type="checkbox"/> HCSHA Healthcare Expenditure (all active datasets linked to his organisation)	-

[Prospective Domains/Datasets](#)

Send membership request to

☒ My Transmission Coordinator in my organisation ([see who he/she is](#))
☐ My Domain Manager(s) In Eurostat

Top

Figure 6 – Selecting the recipients of the request

In organizations without Transmission Coordinator (TCO), only the "My Domain Manager(s) in Eurostat" option can be selected.

In organizations with appointed TCO (most National Statistical Offices), the TCO can decide whether the Domain Managers at Eurostat are allowed to manage user rights. If they are not, only the “My Transmission Coordinator in my organisation” option can be selected.

3.3 Send the self-registration request and wait for the reply

Click on the “Send request” button. A confirmation is then displayed (Figure 7).

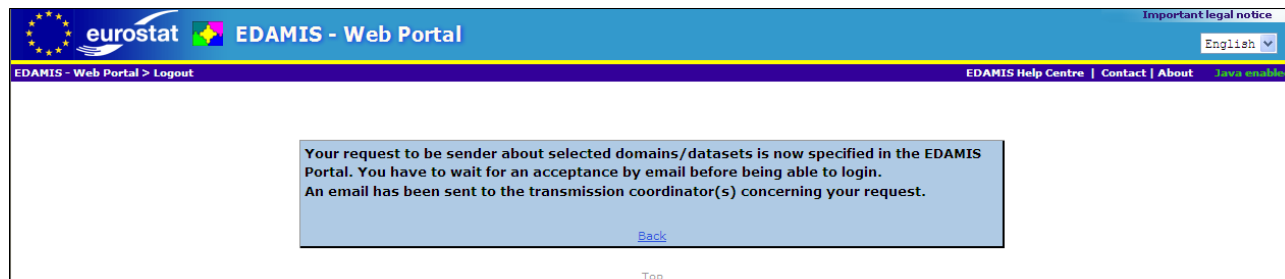

Figure 7 – Confirmation message

The DMA and the TCO receive an e-mail with the requested right and will grant/approve it (in function of the request reception; see 0). Check your e-mails. EDAMIS will inform you about their decision (Figure 8).

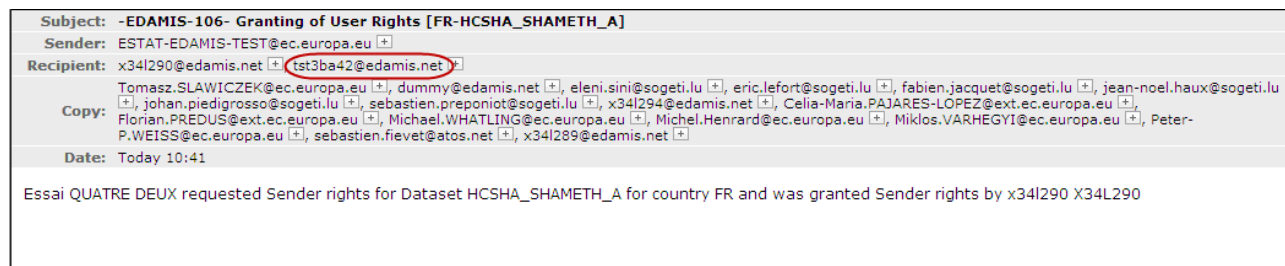

Figure 8 – Self-registration confirmation e-mail

The self-registration is completed. From now on, you are allowed to connect to the EWP using your ECAS username and password and send statistical data files to Eurostat.

4 Main menu

The next time you log in to the EWP the home page is displayed (Figure 9).

Transmitted Datafiles Status												
Country from	Organisation	User	Country to	Reception client	Date	Sent as	Dataset	Year	Period	Size	Conf.	Status
No data file traffic found... Go to datafile traffic to see more results												

Top

Figure 9 – General layout

The main menu bar depends on your profile. The menu bar available for a “Sender” profile is described below:

1. **Transmission:** Allows you to send files to Eurostat.
2. **Reports:** Gives access to a series of reports e.g. traffic monitoring as well as to search functions.
3. **Preferences:** Allows you to change your preferences such as the UI language.
4. **Logout:** Allows you to terminate your session.
5. **EDAMIS Help Centre:** Link to the EDAMIS Help Centre.
6. **Site Map:** Gives an overview of the functionalities you are allowed to use in the EWP.
7. **Contact:** Allows you to send e-mails to the EDAMIS Support.

5 Sending files

In the EWP you can send data files to Eurostat in three ways by clicking on the main menu item **"Transmission"** and then on the sub-menu item **"Send Datafile (Traditional)"**, **"Send Datafile (Advanced)"** or **"Web Form Entry"**.

5.1 *Send Datafile (Traditional)*

Datafiles can be sent with **Simple upload - [Java disabled]** or secure upload **[Java enabled]** form. After clicking on the **"Send Datafile (Traditional)"** sub-menu item from the **"Transmission"** menu, the user has access to the simple (Figure 10) or secure upload form.

The screenshot shows the 'Send Datafile' interface. At the top, there's a header with the Eurostat logo and 'EDAMIS - Web Portal'. Below this is a navigation bar with links like 'Transmission >>', 'Reports >>', 'Preferences', and 'Logout'. The main title is 'Send Datafile' with a subtitle 'Simple upload form'. The form itself has a table for 'Files to transmit' with columns for File name, Dataset, From, To, Year, Period, Trans. period, Encryption?, and Validation?. Below the table, there are input fields for 'Free text comments', 'File with explanatory notes', and 'Dataset label'. There are also buttons for 'Parcourir...' (Browse) and 'Ajouter nouveau fichier' (Add new datafile). At the bottom right, there is a 'Perform transfers' button.

Figure 10 – Simple upload form

A user has the possibility to browse for a file respecting the DSN. A file respecting the DSN fills automatically the fields on the simple upload form, otherwise the user has to select the Dataset manually and the other fields are automatically filled with the current year, period.

5.2 *Send Datafile (Advanced)*

Datafiles can be sent in **secure upload Form – [Java enabled]** This mode is available in Firefox and Internet Explorer v. 9 and higher, and it enables sending confidential data.

After clicking on the **"Send Datafile (Advanced)"** sub-menu item, the web browser downloads a small Java program, an applet, which will be used for sending the data. The applet contains compression and encryption functions that will be automatically applied on the data file before sending. Before the download several requests can be asked (java and/or security request).

5.2.1 *Accept the requests*

The user will be requested to 'Allow the following application from this web side' and/or to 'Allow access to the following application from this side' (See Figure 11 and Figure 12)

Answer **'Allow'** and **'Run'** to run the application using java.

These Security messages displayed may vary depending on the version of the Java Runtime Environment installed.

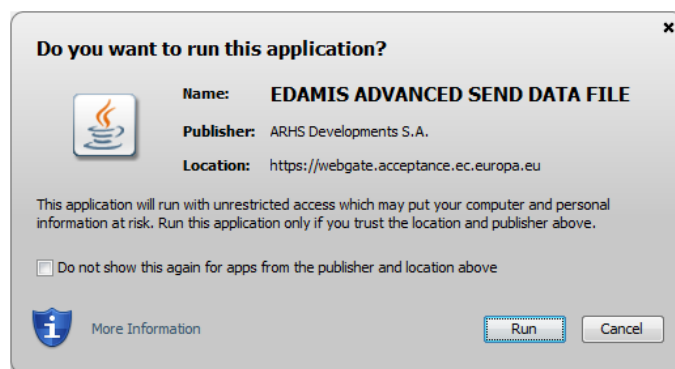

Figure 11 – Security request 1

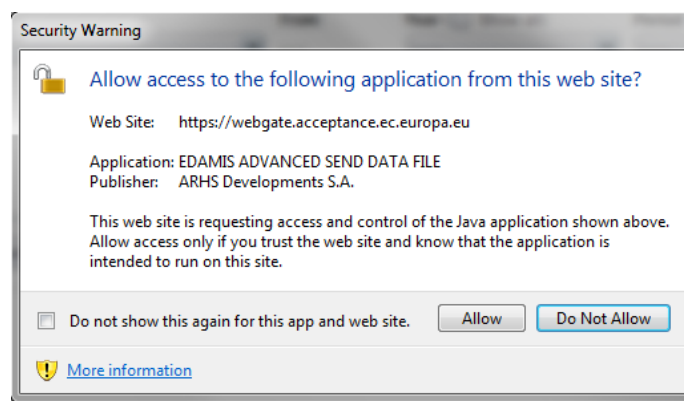

Figure 12 – Security request 2

After running the application, the **“Send Data secure”** form is displayed. Follow these three steps in order to send a data file (Figure 13):

1. Select the **data file** (cf. 5.2.2),
2. Fill in the **metadata** describing the content (cf. 5.2.3),
3. Perform the **transfer** and check the transmission status (cf. 5.2.4),

Figure 13 – Send datafile form

5.2.2 Select the data file

Use the **“Choose a file”** button to select the file you want to send (Figure 14). The file content and format should follow the rules agreed with the data receiver counterpart.

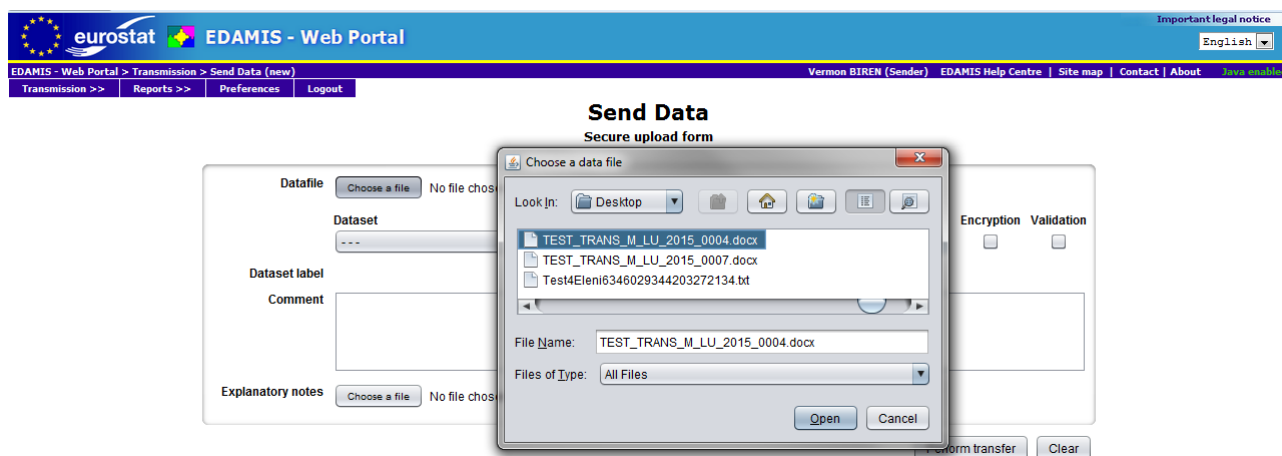

Figure 14 – Selecting the data file

5.2.3 Fill in the metadata

The metadata describes the data content of the file and will be used to deliver it to the appropriate Production Unit(s) in Eurostat (Figure 15). If the file name observes the Dataset Naming Convention (see also the EDAMIS Help Centre) some of the metadata fields will be automatically completed by the application.

Figure 15 – Metadata about the file content

1. **File name:** The file selected for transmission.
2. **Dataset:** The name of the dataset describing the content of the file.
3. **From:** Country and organisation of the sender.
4. **Year:** The reference year for the dataset occurrence.
5. **Period:** The reference period for the data collection within the year. The possible values depend on the periodicity of the dataset. For a monthly dataset 1 to 12, for a quarterly dataset 1 to 4 can be selected etc.
6. **Encryption:** This flag can be set only if the dataset is confidential and has a public encryption key available in EDAMIS. In this case the flag is checked and enabled by default. The user cannot decide to not encrypt the file by unchecking the box.
7. **Validation:** This flag can be set only if validation rules exist for the selected dataset. In this case the flag is ticked and enabled by default. The user cannot decide to not validate the file by unchecking the box².

² Validation and encryption are mutually exclusive

8. **Free text comments:** Your comment will be forwarded to the receivers in the notification e-mail.
9. **File with explanatory notes:** A file (e.g. methodological note) can be attached. It will be forwarded to the receivers via e-mail.

NB: the 2 fields Comment and explanatory note are optional.

5.2.4 Perform the transfer and check the transmission status

Now the applet starts sending the file. You can follow the progress (one progress bar for the file and one progress bar for the exploratory note) on the next screen (Figure 16).

When the process is completed, the status of the transmission is displayed (In this case: 'Transfer finished with success. The file has been delivered').

If you perform a second transfer; the application will present a second transmission report below the first one.

By clicking on the '**Close**' button you can delete the transmission reports.

Figure 16 – Transmission report

5.3 Web Form Entry

EDAMIS Web Forms (EWF) is an integrated component of the EDAMIS Web Portal that supports data transmissions of low volume. Beside the basic functions of EWP it enables a simple validation mechanism upon data entry. For more details about EWF, please refer to the document "[QUG-03-2014-07-30 \[QUG\] \(EDAMIS Web Forms for data providers\) .pdf](#)".

5.4 Data reception

EDAMIS users can send as well as receive data files via the EWP. Select the item "**Received File**" in the "**Transmission**" menu (Figure 17).

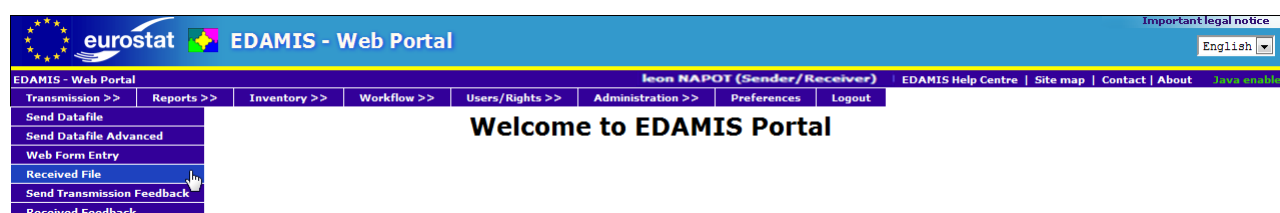

Figure 17 - Received File menu

The list of available files is shown on the "**Received File**" screen (Figure 18). Click on the name of the data file to download it.

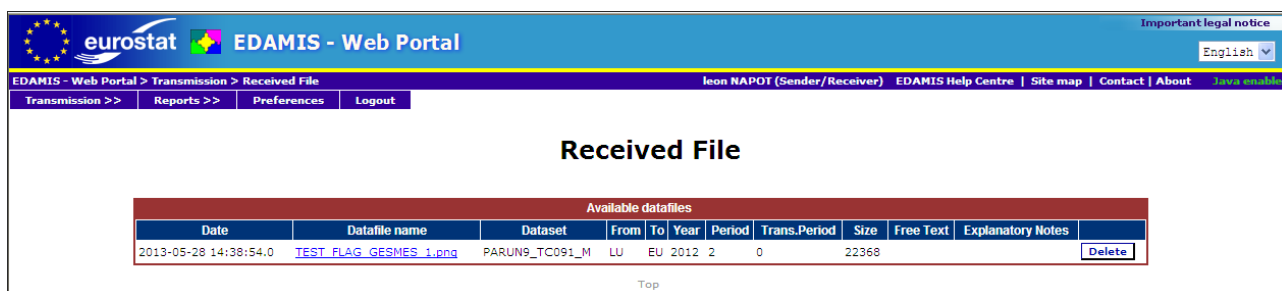

Figure 18 - Received files

After a successful download, it is recommended that you erase the file stored on the EWP server using the **"Delete"** button in the same row. Confirm the deletion of the selected file (Figure 19).

Data files sent by EUROSTAT are delivered

- either to the receiver's dedicated folder on the EWA client machine if EWA is installed in that organisation;
- or to the EWP if the organisation has no EWA client installed.

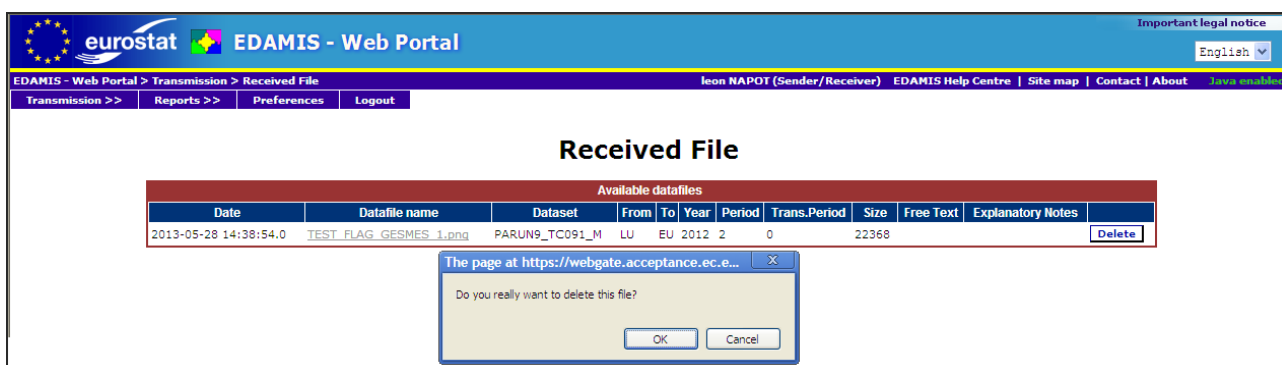

Figure 19 - Delete the received data file on the EWP server

6 Feedback

6.1 *Send feedback*

You may send comments/information back to the senders of the file you have received. Select the item **"Send Transmission Feedback"** in the **"Transmission"** menu (Figure 20).

Figure 20 – Menu Send Transmission Feedback

The list of received files is shown on the **"Send Transmission Feedback"** screen (

7 Preferences

If you have rights on specific datasets, you can ask for more rights. To do this, click on the menu Preferences > My rights, select the role you want for another dataset and click on the 'Save' button (see Figure 26). The request is sent to DMA and/or to TCO. The same workflow can be used to update / remove rights.

8 Monitoring data file transmissions

You can monitor the actual data file traffic as well as the timetable for past and future transmissions using the different filters offered by the EDAMIS reports.

To see the data file traffic, select the main menu **"Report"**, then the sub-menu **"Traffic Monitoring"** and then the item **"Data files traffic"** (Figure 27).
