

European Industrial Policy 2019

Council conclusions on an EU Industrial Policy Strategy: a Vision for 2030

- ≡ Adopted 27/5/2019
- ≡ The Council adopted Conclusions on an “EU industrial policy strategy: A vision for 2030” (cf. attachment).
- ≡ The Council reiterated the calls by the European Council and the Council, supported by the European industry, for a comprehensive and long-term EU industrial policy strategy with a clear vision for 2030, highlighting the opportunities and addressing the challenges for European industry, touching upon all relevant policy areas, accompanied by a specific action plan including concrete measures and a timetable for implementation and monitoring mechanisms”. Furthermore, the Council states that this “strategy should become a top priority for the strategic agenda of the next Commission and be put in place at the beginning of the new EU institutional cycle” while “strongly encouraging the Commission to elaborate this strategy, which should include policy targets and indicators, in close consultation with Member States and all stakeholders”.

The new industrial strategy

- ≡ **A comprehensive long-term strategy for Europe's industrial future.**
 - = Including investment and public procurement, trade, skills, innovation and supporting small and medium-sized businesses (SMEs).
 - = a climate-neutral economy by 2050
 - = the new Circular Economy Action Plan feeds into to our overall industrial strategy
 - = the new SME strategy to help them scale up and expand, including through improved access to finance.
 - = Europe's technological sovereignty in key value chains, including in the defence and space sectors, common standards and future trends.

- ≡ **Defence**
 - = Be responsible for the implementation and oversight of the European Defence Fund.
 - = Focus on building an open and competitive European defence equipment market and enforcing EU procurement rules on defence.

- ≡ **Space**
 - = Foster a strong and innovative space industry, maintaining the EU's autonomous, reliable and cost-effective access to space.
 - = Implement the future Space Programme, covering Galileo and EGNOS, the EU's global and regional satellite navigation systems and Copernicus, the EU's Earth observation programme.
 - = Explore ways in which we can make the most of our assets to deliver on climate objectives, including the use of Copernicus to monitor CO2 emissions.
