AES EDIT validation tool

The current version of EDIT is the version of 31 March 2017.

This version is available in CIRCABC with this direct link: https://circabc.europa.eu/w/browse/285fa0f6-7ad7-4640-afb2-595f5b88c960

In this document we list identified errors that will be corrected in the next version of EDIT.

Once a new version of EDIT is released the AES network will be informed.

Rules that need to be corrected

R164FD	NFEREASON1	Error	NFEREASON1 should NOT be 0. In case of partial non-response and no NFEREASON1_01a AND NFEREASON1_01b AND NFEREASON1_02 AND NFEREASON1_03 AND NFEREASON1_04 AND NFEREASON1_13 AND NFEREASON1_11 AND NFEREASON1_06 AND NFEREASON1_07 AND NFEREASON1_08 AND NFEREASON1_09 AND NFEREASON1_10 AND NFEREASON1_12 is selected, non-response should be recoded as 2
R209FD	NFEREASON2	Error	NFEREASON2 should NOT be 0. In case of partial non-response and no NFEREASON2_01a AND NFEREASON2_01b AND NFEREASON2_02 AND NFEREASON2_03 AND NFEREASON2_04 AND NFEREASON2_13 AND NFEREASON2_11 AND NFEREASON2_06 AND NFEREASON2_07 AND NFEREASON2_08 AND NFEREASON2_09 AND NFEREASON2_10 AND NFEREASON2_12 is selected, non-response should be recoded as 2

These 2 rules currently check that NFEREASONx should not be '0' if any NFEREASONx_01a to NFEREASONx_13 is not '2'. However NFEREASONx_01a, 01b, 02, 03, 04 and 13 could also be '-2' if the NFEREASONx is not job-related (NFEACTxx_PURP different than '1').

R024	HATFIELD	Error	Invalid value (HATFIELD should be between (0011 and 1099) or in (9999,-1,-2))
R070	FEDFIELD	Error	Invalid value (FEDFIELD should be between (0011 and 1099) or in (9999,-1,-2))
R146	NFEFIELD1	Error	Invalid value (NFEFIELD1 should be between (0011 and 1099) or in (9999,-1,-2))
R191	NFEFIELD2	Error	Invalid value (NFEFIELD2 should be between (0011 and 1099) or in (9999,-1,-2))

These 4 rules currently check valid codes for field of education (ISCED-F 2013) from 0011 to 0141. The list should be extended to 1099.
