

Overview on derogation reports under Art.9 of the Birds Directive & links to national reports

Reporting period: 2014 (delivery expected by the end of September 2015)

Last update: 15-11-2016.

Please note that the following table gives an overview on the availability of national reports but does not provide any assessment of their contents.

How to use the table

The table provides links to the folders in Reportnet that include the specific national reports. To visualize the reports please click on the files included in the folder. Then to visualize them in a readable form click on the HTML version. In some cases the reports were included in other formats but are still visible. If something does not work try changing browser, Mozilla and Explorer visualize Reportnet differently. In some cases the folders include additional information in other formats.

In principle each report should indicate in the title and in the "period" field the year of the reporting exercise (in which the derogations were actually active). In a few reports this approach is not followed.

In some cases there are old versions or wrong reports. The links included in this table are the ones indicated as correct by the national authorities.

Legend:

Report not received.

A report that is not accessible on Reportnet because locked from public view by national authorities, or not uploaded to Reportnet and sent directly.

Report received (independently from its quality).

Overview on derogation reports under Art.9 of the Birds Directive for reporting period 2014
