Dear Mr Hindryckx,

**Subject: Commission decision concerning Case BE/2011/1276: Details of remedies concerning the market for wholesale broadband access in Belgium**

**Article 7(3) of Directive 2002/21/EC:<sup>1</sup> No comments**

## **I. PROCEDURE**

On 24 November 2011, the Commission registered a short notification from the national regulatory authority of Belgium, the Belgian national regulatory authority, the *Institut Belge des Services Postaux et des Télécommunications* (IBPT), concerning technical details of the implementation of the previously imposed obligation to use the Customer Premises Equipments (CPE) of alternative operators on the incumbent's network.

The national consultations<sup>2</sup> ran from 1 March 2011 to 10 May 2011. The deadline for the EU consultation under Article 7 of the Framework Directive is 3 January 2012.

Pursuant to Article 7(3) of the Framework Directive, national regulatory authorities (NRAs), BEREC and the Commission may make comments on notified draft measures

to the NRA concerned.

## **II. DESCRIPTION OF THE DRAFT MEASURES**

### **II.1. Background**

Under case BE/2011/1228 IBPT consulted its second review of the market for wholesale broadband access (WBA) confirming that the bitstream remedy provides access seekers with a fully fledged active product, which allows alternative operators sufficient possibilities to differentiate their products at retail level. In this context the Belgian regulator explained that the WBA VDSL2 offer allows *inter alia* for (i) interconnection at different levels (local and regional), (ii) the flexible allocation of virtual local access networks, (iii) the ability to differentiate quality of service levels, service speeds and service symmetry, (iv) the control of customer premises equipment, and (v) support for the multicast functionality.

### **II.2. The notified draft measure by way of a short form**

The current notification concerns the review of the technical details of the implementation of the previously imposed obligation to use the CPEs (i.e. modems) of alternative operators on the incumbent's network, previously consulted with the Commission under case number BE/2011/1228.

These additional technical conditions are necessary to ensure that the introduction of the CPEs of alternative operators on the incumbent's network will not jeopardize the proper functioning of the latter, the integrity of its network and its evolution. It also defines the respective responsibilities of the incumbent and the alternative operators regarding the CPE. Finally, IBPT has aimed to ensure that alternative operators do not have to comply with unnecessary or disproportionate conditions to put their own CPEs in place.

## **III. NO COMMENTS**

The Commission has examined the notifications and has no comments.<sup>3</sup>

Pursuant to Article 7(7) of the Framework Directive, IBPT may adopt the draft measure and, where it does so, shall communicate it to the Commission.

The Commission's position on this particular notification is without prejudice to any position it may take *vis-à-vis* other notified draft measures.
