## I. TRANS MODULES

### I.1. SEARCH INTERFACE

When searching by 'Status' criterion, customs agents (person responsible for the load) and competent authority will receive a list of documents filtered by the requested status.

**Search for CVEs for Animal Products**

## I.2. "COPY AS NEW" FUNCTION IMPROVEMENTS

Attachments will be no longer copied to a new document when using the 'Copy as new' function.

The screenshot illustrates the 'Copy as new' function. On the left, an 'Attachments' table shows a file named 'cert13105035.tif' with a size of 305890. A red box highlights this file. In the center, a 'Search Result' table shows a certificate reference 'CVEDP.FR.2014.0000015' from Canada, with a description 'Goldfish Export'. A red box highlights the 'Copy as new' button. A red arrow points from this button to the 'Attachments' table of a new document on the right, which is currently empty, demonstrating that attachments are not copied.

## II. CVED MODULE

### II.1. "IN PROGRESS" CVED-P WITH RASFF STATUS "IN PROGRESS"

Consulting the 'Similar rejected' tab is no longer obligatory if both CVED-P and RASFF notification have a status 'In Progress'.

### II.2. RE-ENFORCED CHECK PROGRAMME IMPROVEMENTS

Several technical modifications have been introduced to improve the re-enforced checks (REC) programme module performance in TRACES.

- It is possible from to search by criterion 'Approval number' of the establishment under the REC programme:

The screenshot shows the 'Search for Re-enforced Check' interface. Under 'Search Criteria', the 'Approval Number' field is highlighted with a red box and contains the value '01.018'. Below the search criteria, the 'Search Result' table displays the following data:

| Description                          | Country    | Business name                           | Commodity | Laboratory Tests | Date       | Last Check | Already Released | Status |       |
|--------------------------------------|------------|---|-----------|------------------|------------|------------|------------------|--------|-------|
| RASFF alert on CVEDP.FR.2013.0024396 | Mauritania | Afri Fish<br>Approval number:<br>01.018 | FFP       | Cadmium Cd       | 22/08/2013 | 2 (1)      | 2                | Active | ▶Open |

- Physical check result will be pre-defined as 'Not satisfactory' when a CVED is issued for consignments under REC programme:

The screenshot shows the TRACES web interface for a 'Common Veterinary Entry Document for Animal Products'. The main section is 'Decision on Consignment: Checklists & Laboratory Tests'. It is divided into two main parts: 'Checklists' and 'Laboratory Tests'.

**Checklists:**

- 26. Documentary Checks:** Radio buttons for 'Satisfactory' and 'Not satisfactory'.
- 27. Identity Checks:** Radio buttons for 'Seal Check', 'Satisfactory', 'Full Identity Check', and 'Not satisfactory'.
- 28. Physical Checks:** Radio buttons for 'Not Done', 'Satisfactory', and 'Not satisfactory' (which is selected).

**Laboratory Tests (29):**

- Tests Executed:** Radio buttons for 'Yes' (selected) and 'No'.
- Date:** A text input field.
- Motivation:** Radio buttons for 'Random', 'Suspicion', and 'Re-enforced'.
- Tested for:** A dropdown menu.
- Result:** Radio buttons for 'Pending', 'Satisfactory', and 'Not satisfactory'.

At the bottom, there are buttons for 'Cancel and Return to Menu', 'Save as in progress', and 'Submit decision'.

This pre-defined option is implemented because currently *not satisfactory results* of laboratory tests, taken for the substance under the REC programme, are frequently not followed by *not satisfactory status* of physical checks. As a result, calculation of series of consecutive consignments is jeopardised. However, a certifying official veterinarian has an option to change the physical checks results depending on the outcome of the laboratory tests taken.

The content of notification e-mail, sent in case of fulfilled REC programme, has been improved. From now on it mentions a title of the fulfilled REC programme and an establishment activity type is displayed in accordance with establishment listing requirements:

Dear colleagues,

The re-enforced checks programme for the following business has been fulfilled: (RASFF alert on CVEDP.FR.2013.00308111)

- FFP ,CN 100405

**"Goldfish Export Inc"**

### III. EXPORT MODULE

#### III.1. EXPORT CERTIFICATE PRINTOUT

The following correction has been applied:

both **country of destination** and the **name of the place of loading** are correctly displayed in a certificate pdf version:

|                          |  |                       |                                     |           |                             |
|--------------------------|--|-----------------------|-------------------------------------|-----------|-----------------------------|

# **T**RAde Control and Expert System (TRACES)

is a management tool for **tracking movements** of animals, products of animal origin from both outside and within the European Union. It also covers imports to the European Union of feed and food of non-animal origin as well as plants, seeds and propagating materials.

TRACES aims to **improve** the relationship between the **private** and **public sectors**, and to **strengthen cooperation** between EU parties. It aims to **facilitate trade**, to **enhance the safety** of the food chain and to **protect animal health**.

This system **consolidates** and **simplifies** the existing systems. It is a major innovation in improving the **management of animal diseases** and reducing **the administrative burden** on economic operators and competent authorities.

Dr Didier CARTON  
Head of the TRACES Sector
