Introduction to breakout sessions

Anna Szczepanska
EFPIA
What do we want to achieve?

General: Recommendations on most effective pathways for international convergence of 3Rs in regulatory practice

Specific: Recommendations on convergence of requirements for case studies presented
How do we get there?

- Detailed presentations of each case study
- Discussion to address questions laid out in the case study outlines, including:
  - Why differences in approaches exist across regions as far as regulatory acceptance of 3Rs methods is concerned versus reliance on traditional animal testing models;
  - Understanding of barriers and major hurdles to harmonized implementation of 3Rs in regulatory practice;
  - Data evidence requirements that would facilitate such uptake across various regions.
Your breakout session on your badge/list

**Output?**

Brief reports to the plenary with answers to questions, including proposed solutions and steps towards harmonized translation/uptake of 3Rs into regulatory practice

Reports will be given by the moderators tomorrow
