| CoP7 Sound methodology | PC7 Sound methodology | 7.1/7.1 | | 2.1 2.2 2.3 2.4 S 6 S12.1 | <p>Pls specify the relevant statistical standards to which the statistics abide</p> <p><i>Links/references to existing comprehensive methodological documentation on specific aspects of the national sources and methods can also be provided</i></p> | <p>General remarks:</p> <p>The European Union Labour Force Survey (EU-LFS) provides population estimates for the main labour market characteristics, such as employment, unemployment, inactivity, hours of work, occupation, economic activity, and other labour related variables, as well as important socio-demographic characteristics, such as sex, age, education, household characteristics and regions of residence. The contents of the Finnish LFS are mainly based on the EU LFS regulations.</p> <p>The definitions of employment and unemployment, as well as other survey characteristics follow in general the definitions and recommendations of Eurostat and the International Labour Organisation. The definition of unemployment is further specified</p> |

| | | | | | |
|--|---|-------------|-------------------|---|--|
| | | | | | in Commission Regulation (EC) No 1897/2000. Comprehensive EU-LFS methodological documentation: http://ec.europa.eu/eurostat/statistics-explained/index.php/EU_labour_force_survey |
| | | | | Pls specify adherence or deviations from concepts and rules according to international standards and highlight coverage gaps that are of <u>material relevance</u> for the statistics. Pls indicate whether actions to address the deviations and coverage gaps are envisaged. | There are no major country-specific deviations between the concepts and rules to the ILO standards and definitions concerning the data on the labour status. |
| CoP8 Appropriate Statistical procedures | PC8 Appropriate Statistical procedures | 8.2/8. 2 | 3.1 3.3 3.4 | S12.1 S21.1 S21.3 S 21.5- 6 <i>Pls provide a succinct assessment of the robustness of the statistics by elaborating briefly on the relevant sources of information, statistical methods and procedures used across the various frequencies. Pls provide links/references to existing comprehensive methodological documentation on specific aspects of the national statistical procedures. The objective should be to get an overview on how much the statistical output are anchored in actual collected data rather than on estimation methods or similar judgemental inputs.</i> | The following publications provide users with a tool for assessing the quality of the statistics which are based on the EU-LFS. It gives a brief description of the survey and a summary of the main quality indicators, which are: relevance, accuracy, accessibility and clarity, timeliness and punctuality, comparability, and coherence. The quality report is updated annually. Labour force survey in the EU, candidate and EFTA countries — Main characteristics of national surveys Quality report of the European Union Labour Force Survey See: http://ec.europa.eu/eurostat/web/lfs/publications/quality-reporting Further individual country information: http://ec.europa.eu/eurostat/cache/metadata/EN/employ_esqrs.htm Additionally, various methodological documents are available at Statistics Finland (contact details available on Statistics Finland's |

| | | | | | | web page). |
| CoP11 Relevance | PC11 Relevance | 11.1- 11.3 | 0.3 | S.14 | <p>Pls specify briefly why the statistics are relevant by referring to the multiple purposes for which the statistics are used at (i) international, (ii) EU and (iii) national level.</p> <p>References to the statistical legislation and other formal or informal commitments could be sufficient.</p> <p>In addition, if applicable, the outcome of user consultation processes could also be given.</p> | <p>EU-LFS results are used by the DG Employment and a number of other Directorates of the Commission mainly for measurement and monitoring of policy agenda purposes. The European Central Bank (ECB) uses short term LFS statistics related to Euro area. Key users include NSI's, international organizations, news agencies and researchers which use various aspects of EU-LSF data for international or intra EU comparisons.</p> <p>Results are also used for national user needs.</p> |
| CoP12 Accuracy and reliability | PC12 Accuracy and reliability (including stability) | 12.1/ 12.1 | 3.5 | S 15.1 S 15.2 S15.3 S.18. 2 S | <p>The analysis should be based on the following indicators (to be compiled by the ECB/Eurostat on a common data vintage) on the reliability of first releases for the relevant series (selected for their material impact and to avoid compensatory effects in the case of balancing items):</p> <p>Directional reliability indicators;</p> <p>Revisions' indicators (e.g. MAPE, MACE or RMSRE depending on the indicator).</p> | <p>Information on the accuracy and reliability of the LFS data by providing information on the quality indicators.</p> <p>Confidence limits at 95 % level of significance, country-specific annual average 2014: Number of employed (x1000): 2 447 ± 13, Number of part time employed (x1000): 377 ± 10, Number of unemployed (x1000): 232 ± 7, Rate of unemployment (%):8.7 ±0.2</p> |

| | | | | | | |
|-------------------------------------|--|--------------|-----|------|--|---|
| | | | | 20.2 | and provide a succinct assessment of the accuracy and reliability of the statistics on the basis of the results, with an attempt to provide a relative objective measure, explaining also the main reasons for revisions. | |
| | | | | | Pls provide a succinct assessment of the level of the statistical discrepancies (“ <i>internal consistency</i> ”) focusing on their size and direction (systematic bias). | Information on country-specific frame quality (under and over coverage and misclassifications) of the LFS sample and specific measurement errors. Undercoverage: The sampling frame used is the total population database maintained by Statistics Finland. It is based on the Population Information System of The Population Register Centre and updated regularly. Undercoverage fairly small (no large-scale immigration). Overcoverage: Mostly emigration in wave 1, deaths and emigration for later waves. Rate is 1.6% |
| CoP13 Timeliness and punctuality | PC13 Timeliness (including punctuality) | 13.1 13.4 | 4.1 | S.16 | Pls specify the timeliness requirements for international and EU purposes and the national target publication dates. Pls specify punctuality defined as deviations in relation to the timeliness requirements and target dates specified above. | Information on possible delay of delivery to Eurostat of the full dataset. Information not available for publication According to Council Regulation (EC) No 577/98 data shall be delivered to Eurostat within twelve weeks from the end of a reference quarter. For 2014 deadline for transmitting the data was respected. |

| | | | | | | |
|--------------------------------------|---------------------------------------|---------------|----------------|-----------|---|---|
| CoP14 Coherence and comparability | PC14 Consistency and comparability | 14.1/ 14.1 | 4.2.1 | S17.2 | <p>Pls provide a succinct assessment of the results of the consistency check of the statistics with other related domains or data sets with which the statistics must show coherence (“<i>external consistency</i>”).</p> <p>The results should provide a relative objective measure to facilitate cross-country comparability, e.g. be presented as a ratio of the inconsistency between compared statistics, as a percentage of GDP, where appropriate.</p> | <p>Information on the assessment of the results of the consistency check of the statistics with other related domains (“external consistency”). Coherence of LFS data with National Accounts data, registered unemployment and Business statistics data.</p> <p>Generally coherence to other statistics can be limited due to different sources, different scopes or different coverage and units.</p> <p>For a summary of the deviations see: http://ec.europa.eu/eurostat/web/products-statistical-working-papers/-/KS-TC-15-004 (Chapter 8)</p> |
| | | | 4.2.2 4.2.3 | S 18.1 | <p>Pls provide a succinct assessment of the time consistency, specifying (i) whether the time series presents breaks and if so explaining the reasons for the breaks; (ii) the length of the series for which back data are consistent; and (iii) whether the statistics are consistent across the various frequencies (monthly/quarterly/annual) where relevant.</p> | <p>The information applies only to LFS detailed survey results series. The LFS adjusted series (including LFS main indicators) include corrections for breaks.</p> <p>Since 1983, improved comparability between results of successive surveys has been achieved, mainly due to increased harmonisation, greater stability of content and higher frequency of surveys. However, the following factors may somewhat detract from perfect comparability:</p> <ul style="list-style-type: none"> - population figures used for population adjustment are revised at certain intervals on the basis of new population censuses; - reference periods may not have remained the same for a given country due to the transition to a quarterly continuous survey; - countries may modify their sample designs; - in order to improve the quality of results, countries may change the content or order of their questionnaire. <p>Information on EU-LFS breaks and individual country breaks are</p> |
