

EEA data/map viewer on UWWTD

Beate Werner, EEA
Anita Künitzer, ETC ICM
Prepared by ETC/ICM

UWWTD reporting - fit for purpose

- SIIF – from pilot to institutional and technical consistent framework
- UWWTD reporting in a political and technical context of the WFD

→ clear business processes for reporting – ensuring high quality and policy relevant assessments

UWWTD data products

- [UWWTD Waterbase-reported data \(art.15 data\)](#)
- [UWWTD Waterbase– derived data](#)
- (compliance assessment results, URL links to individual web sites, links to the UWWT fiche in data viewer) assessment
 - [UWWTD Map viewer](#)
 - [UWWTD Data viewer](#)
- Reference layer of the catchments of sensitive areas

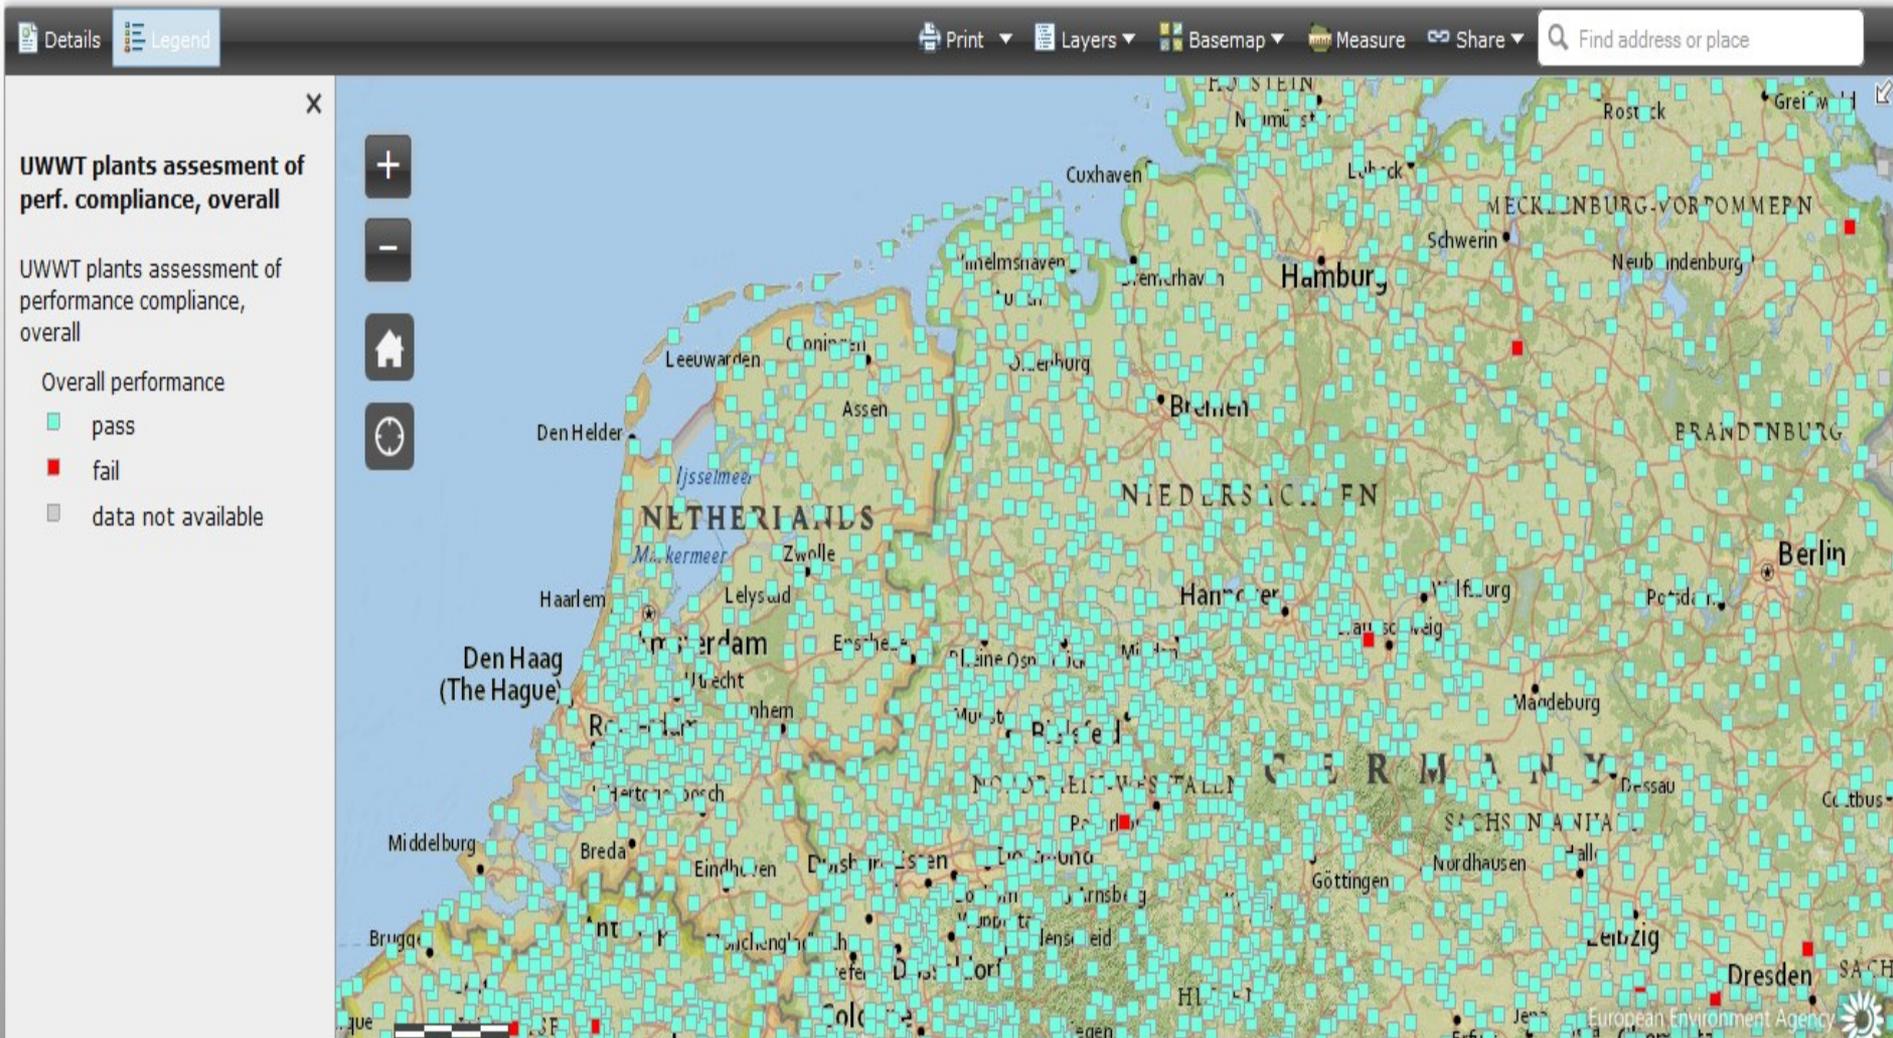

UWWTD map viewer

- What's new:
 - New layer on UWWT plants performance compliance (based on MS self-assessment)
 - New layer on additional polishing treatment (e.g. Disinfection, filtration, etc.)
 - Links to the National websites on UWWTD implementation
 - Pop up windows more user friendly
 - Link to detailed data sheets (UWWT fiche-report- in data viewer) derived from the Waterbase
 - [URL to the map viewer](#)

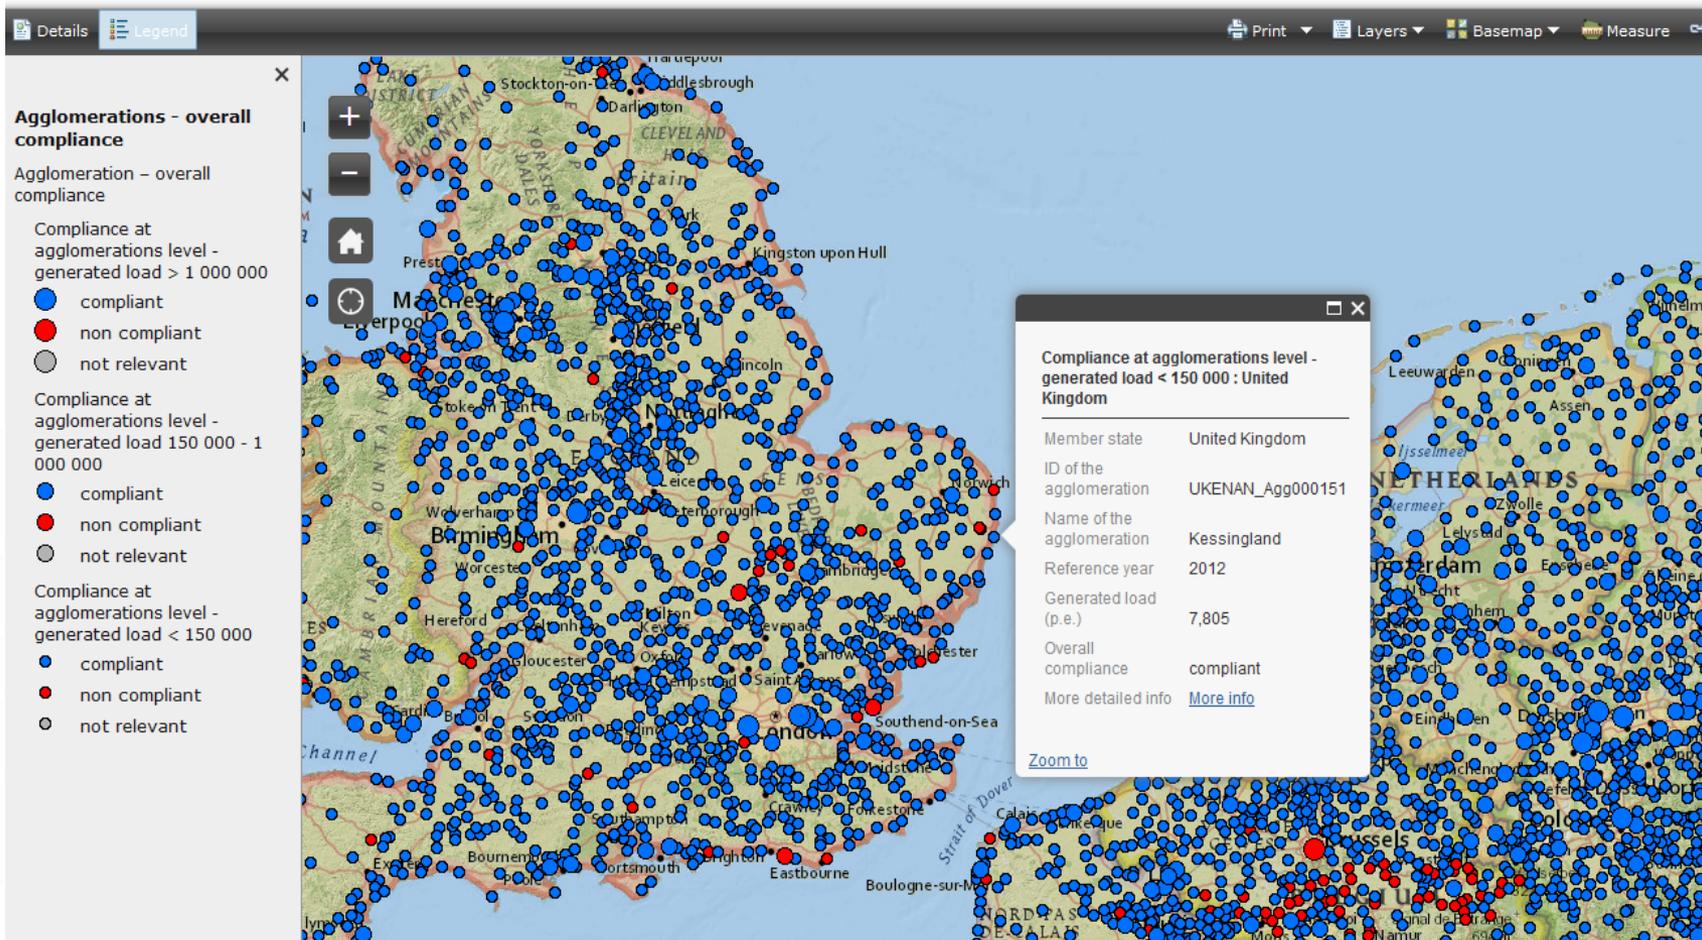

NEW: UWWT plants performance compliance

UWWT maps - 20150225

UWWTD map viewer- agglomerations-overal compliance (NEW: user frindly pop-up windows)

New: UWWTD treatment plants –by treatment type (example of the link to the UWWT fiche)

DETP_NW2426

Eslohe-Bremke

Germany

Description of the UWWTP [Direct access on the map](#)

Region	DEA57 (Hochsauerlandkreis)
Latitude	8.19584
Longitude	51.2577
Design capacity	14500
Treatment in place	Other
Date of closing	

Description of the discharge point [Direct access on the map](#)

Name of the discharge point	Eslohe-Bremke
ID of the discharge point	DEDP_NW2426
Name of the RCA	Deutschland
ID of the waterbody	DE_RW_DENW27616_13_31
Name of the waterbody	N/A
ID of the RBD	2000
Name of the RBD	2000
Does the discharge affect other directives	

Key figures of the UWWTP

Entering load	10095
Volume of waste water treated (m3/d)	2031776
Incoming BOD [kg/d]	
Discharged BOD [kg/d]	
%BOD removal	
Incoming COD [kg/d]	
Discharged COD [kg/d]	
%COD removal	
Incoming N [kg/d]	40.531
Discharged N [kg/d]	10.659
%N removal	0.2629839
Incoming P [kg/d]	6.448
Discharged P [kg/d]	1.066
%P removal	0.1653226

Compliance of the UWWTP

Performance compliance BOD	pass
Performance compliance COD	pass
Performance compliance TSS	
Performance compliance N	pass
Performance compliance P	pass

Description and Key figures of the Agglomerations served by the UWWTP

Name of the agglomeration	ID of the agglomeration	Type of collection system	Generated load	Rate of load collected	Rate of load addressed to IAS	Rate not addressed to IAS and not collected	Rate of load collected and entering treatment plants	Raw sewage discharged (collection system) (m3/d)	Raw sewage discharged (collection system) (p.e.)
Unteres Liesertal GKA (Lieser)	DEAG_RP105130788		21226	99	1	0			

Role of current map view in a SIIF approach

- Still based on normal reporting via CDR – no other viable business processes so far.
→ avoid any inconsistency between different tools
- 8th exercise – data quality problems, better QA/QC is needed before any (dissemination) map viewer
→ QA/QC and processes set up for WFD now are suitable for UWWTD
- Links to MS web-sites included manually, no updated mechanism agreed yet → processes needed
- No ISPIRE reporting services realised yet
→ needs institutional framing at EEA – AND TIME!

THANK YOU

Topics: **Water**

The UWWTD dataviewer enables an easy access and analysis of the data reported under the article 15 of the UWWTD. The information is presented in interactive tables, maps and charts, and can be downloaded or printed based on your selections.

Waste Water Infrastructure - tables and charts

Here you will find pre-defined queries that will allow you to filter the data according to several criteria, e.g. size of agglomeration, type of receiving area, Member State(s), etc. Information is presented in tables or charts. For large tables it is recommended to use the export function.

Agglomerations

Urban waste water treatment plants

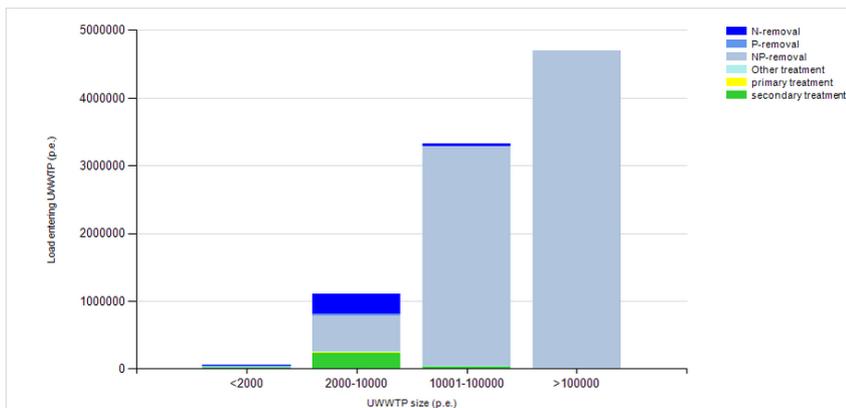

Receiving areas

Member State	Reported Period	ID UWWTP	Name UWWTP	State UWWTP	UWWTP/collecting system without treatment	Organic design capacity (p.e.)	Type of treatment	Monitoring results BOD	Monitoring results COD	Monitoring results TSS	Monitoring results Nitot	Monitoring results Plot	ID of receiving area	Type of receiving area
Estonia	2009	EE63211	Kahta-Järve	active	Collecting system is connected to UWWTD	191400	NPRemoval	pass	pass	pass	pass	pass	EE10	Art. 5(B) area (entire Member State)
Estonia	2009	EE061415	Tallin	active	Collecting system is connected to UWWTD	500000	NPRemoval	pass	pass	pass	fail	pass	EE10	Art. 5(B) area (entire Member State)
Estonia	2009	EE079514	Tartu	active	Collecting system is connected to UWWTD	167000	NPRemoval	pass	pass	pass	fail	pass	EE10	Art. 5(B) area (entire Member State)
Estonia	2009	EEHAq021	Loksa	active	Collecting system is connected to UWWTD	3850	NPRemoval	pass	pass	pass	not relevant	not relevant	EE10	Art. 5(B) area (entire Member State)
Estonia	2009	EEHAq022	Paide	active	Collecting system is connected to UWWTD	6000	Secondary treatment	pass	pass	pass	not relevant	not relevant	EE10	Art. 5(B) area (entire Member State)
Estonia	2009	EEHAq048	Kose	active	Collecting system is connected to UWWTD	3000	PRemoval	pass	pass	pass	not relevant	not relevant	EE10	Art. 5(B) area (entire Member State)
Estonia	2009	EEHAq053	Juri	active	Collecting system is connected to UWWTD	4200	PRemoval	pass	pass	pass	not relevant	not relevant	EE10	Art. 5(B) area (entire Member State)

UWWTD Data Viewer

Size distribution of UWWTPs in terms of load treated and type of treatment in CZ2010

Reference layer

- Update of the reference layer based on 2013 data
- The following MS submitted updated spatial data:
 - BG, CY, ES, FR, HR, IE, IT, SI, UK
- ETC ICM carried out the quality assurance of the shape files and attributes and checked the consistency with the tabular data on receiving areas.
- After the topology check ETC ICM performed a cleaning of the compiled layer of the catchments. The final (cleaned) version was sent to the reporters and approved.
