It is understood that the above opinions are also those of each Member State's Scientific Authority and will be reflected in any opinion given in relation to the application of Art. 4.1(a) and 4.2(a) of Regulation 338/97. These opinions will remain valid unless or until circumstances related to the trade or conservation status of the species change significantly

Unless specifically stated otherwise, all decisions relate to wild specimens.

Recommendation based on the following guidelines: The species is in trade or is likely to be in trade, and introduction to the Community from the country of origin at current or anticipated levels of trade is likely to have a harmful effect on the conservation status of the species or the extent of the territory occupied by the species.

Tridacna derasa	Palau
Tridacna squamosa	Viet Nam
Cypripedium japonicum	China
Cypripedium japonicum	South Korea
Cypripedium micranthum	China

5) No opinion for import of specimens of the following species / countries combinations

Rationale for the "no opinion":

- ii) Decision deferred: There are insufficient data on the species.
- iii) All applications to be referred to SRG: The species is not currently (or is only rarely) in trade, but significant trade in relation to the conservation status of the species could be anticipated.
