

**COMMUNITY SURVEY ON ICT USAGE AND E-COMMERCE IN ENTERPRISES**

**2015**

**General outline of the survey**

<b>Sampling unit:</b>	Enterprise.
<b>Scope / Target Population:</b>	<p><b>Economic activity:</b></p> <p>Enterprises classified in the following categories of NACE Rev. 2:</p> <ul style="list-style-type: none"> <li>- Section C – <i>“Manufacturing”</i>;</li> <li>- Section D, E – <i>“Electricity, gas, steam and air conditioning supply”</i> <i>“Water supply, sewerage, waste management and remediation activities”</i>;</li> <li>- Section F – <i>“Construction”</i>;</li> <li>- Section G – <i>“Wholesale and retail trade; repair of motor vehicles and motorcycles”</i>;</li> <li>- Section H – <i>“Transportation and storage”</i>;</li> <li>- Section I – <i>“Accommodation and food service activities”</i>;</li> <li>- Section J – <i>“Information and communication”</i>;</li> <li>- Section L – <i>“Real estate activities”</i>;</li> <li>- Division 69 - 74 – <i>“Professional, scientific and technical activities”</i>;</li> <li>- Section N – <i>“Administrative and support service activities”</i>;</li> <li>- Group 95.1 – <i>“Repair of computers and communication equipment”</i></li> </ul> <p><b>Enterprise size:</b> Enterprises with 10 or more persons employed.</p> <p><u>Optional:</u> enterprises with number of persons employed between 1 and 9.</p> <p><b>Geographic scope:</b> Enterprises located in any part of the territory of the country.</p>
<b>Reference period:</b>	Year 2014 for the value or % of sales/orders data and where specified. Where not specified respondents should consider as reference their current situation (survey period in 2015).
<b>Recommended survey period:</b>	First quarter 2015.
<b>Questionnaire:</b>	The layout of the national questionnaire should be defined by the country. However, countries should follow the order of the list of variables enclosed, if possible. The background information (Module X) should be placed at the end of the questionnaire. This information can be obtained in 3 different ways: from national registers, from Structural Business Statistics or collected directly with the ICT usage survey. Every effort should be made to obtain them from the most recent SBS survey. Countries can include additional questions.
<b>Target respondent:</b>	A decision maker with major responsibility for ICT-related issues in the enterprise (the ICT manager or a senior professional in the ICT department). In smaller enterprises, the respondent should be someone at the level of managing director or the owner. In any case the respondent should not be someone with responsibilities only in accounting.
<b>Sample size, stratification:</b>	<p>The sampling design and the resulting sample size should be appropriate for obtaining accurate, reliable and representative results on the variables and items in the model questionnaire.</p> <p>This objective should be achieved for the overall proportions as well as for the proportions for the different breakdowns of the population defined below:</p>

	<p>NACE and size class. NACE breakdown and enterprise size class breakdown are not required to be cross-tabulated.</p> <p>This requirement aims at ensuring the collection of a complete dataset – without empty, confidential or unreliable cells – for these indicators – with an exception for those broken down by economic activity for the calculation of <b>European</b> NACE aggregates.</p>
<p><b>NACE breakdown:</b></p>	<p><b>(To be applied to: all variables; enterprises with 10 or more persons employed; whole territory of the country.)</b></p> <p>Data should be broken down by the following NACE Rev. 2 aggregates for possible calculation of <b>national</b> NACE Rev. 2 aggregates:</p> <ul style="list-style-type: none"> <li>1 10 - 18</li> <li>2 19 - 23</li> <li>3 24 - 25</li> <li>4 26 - 33</li> <li>5 35 - 39</li> <li>6 41 - 43</li> <li>7 45 - 47</li> <li>8 47</li> <li>9 49 - 53</li> <li>10 55</li> <li>11 58 - 63</li> <li>12 68</li> <li>13 69 - 74</li> <li>14 77 - 82</li> <li>15 26.1 - 26.4, 26.8, 46.5, 58.2, 61, 62, 63.1, 95.1</li> </ul> <p><u>Breakdowns for which national data should be provided with the purpose of possible calculation of <b>European</b> NACE aggregates.</u></p> <p>The production and transmission of these aggregates with an accuracy that allows the release at national level is <u>optional</u>. The production and transmission of these aggregates with an accuracy that may not allow the release at national level (use of flag u: unreliable) but are accurate enough to be combined with other countries' aggregates to be released at European level is <u>mandatory</u>.)</p> <ul style="list-style-type: none"> <li>1a 10 - 12</li> <li>1b 13 - 15</li> <li>1c 16 - 18</li> <li>4a 26</li> <li>4b 27 - 28</li> <li>4c 29 - 30</li> <li>4d 31 - 33</li> <li>7a 45</li> <li>7b 46</li> <li>10a 55 - 56</li> <li>11a 58 - 60</li> <li>11b 61</li> <li>11c 62 - 63</li> <li>14a 77 - 78 + 80 - 82</li> <li>14b 79</li> <li>15a 95.1</li> </ul>
<p><b>Size class breakdown:</b></p>	<p><b>(To be applied to: all variables; aggregate of all mandatory NACE aggregates [1 to 15 defined above]; whole territory of the country.)</b></p> <p>Data should be broken down by the following size classes according to the number of persons employed:</p> <ul style="list-style-type: none"> <li>1 10 or more</li> <li>2 10 - 49 (small enterprises)</li> <li>3 50 - 249 (medium enterprises)</li> <li>4 250 or more (large enterprises)</li> </ul>

	<p><b>Optional:</b></p> <p>5 1 - 9</p> <p>6 1 - 4</p> <p>7 5 - 9</p>
<b>Weighting of results:</b>	<p>Results should in general be weighted by number of enterprises. <u>Turnover weighting</u> should be used for sales related questions. Quantitative variables in the e-Commerce module related to sales should be weighted by total turnover.</p> <p><u>Weighting by the number of Persons Employed</u> should be applied for variables related to questions A2, C2, C6 and for other variables e.g. % using the internet, % having broadband, % having a website, % sending orders via a website or EDI-type messages, % receiving orders placed over a website or via EDI-type messages, as specified in the transmission format document.</p>
<b>Treatment of non-response/'Do not know':</b>	<p><b>Unit non-response:</b> The non-respondent units should be assumed to resemble those who have responded to the survey and be treated as non-selected units. For this, the weighting or the grossing up factors should be adjusted: the design weight <math>N_h / n_h</math> is replaced by <math>N_h / m_h</math> where <math>N_h</math> is the size of stratum <math>h</math>, <math>n_h</math> is the sample size in stratum <math>h</math> and <math>m_h</math> is the number of respondents in stratum <math>h</math>.</p> <p><b>Item non-response:</b> Logical corrections should be made, when information can be deduced from other variables, and priority given to further contacts with enterprises to collect the missing information. For the categorical variables (e.g. the YES/NO questions), respondents with item non response or 'do not know' should not be imputed with values from respondents who answered the question. Numerical variables shouldn't be imputed (see also Methodological Manual).</p>
<b>Tabulation of results:</b>	<p>For the categorical variables, estimates should be made for the total number of enterprises for each response category, tabulated using the breakdowns specified above.</p> <p>For the quantitative variables (turnover, sales and number of persons employed), when collected in absolute or percentage terms (and not in percentage classes), estimates should be made for the total values in absolute terms, tabulated using breakdowns as specified in the transmission format document.</p>
<b>Data transmission:</b>	<p>Results are to be sent to Eurostat following the transmission format described in a forthcoming Eurostat document.</p>

**Disclaimer:** References to third-party brands, products and trademarks are for the sake of clarification and are not intended to promote the use of such products.

**ICT-Entr 2015 - Model Questionnaire V 0.9.Docx – Response burden**

<b>Module</b>	<b>Description</b>	<b>Mandatory questions</b>	<b>Optional questions</b>
A	Use of computers	1	1
B	ICT specialists and skills	12	0
C	Access and use of the internet	13	6
	<i>Use of Social media</i>	10	
D	Use of cloud computing services	0	10
E	Sharing of information electronically within the enterprise	3	0
F	Sharing Supply Chain Management Information electronically	3	0
G	ICT Security	5	0
H	Electronic invoicing	0	6
I	e-Commerce	14	13
X	Background characteristics	(3)	(0)
<b>Total</b>		<b>64 (61)</b>	<b>36</b>

In parenthesis the number of questions without Module X: Background characteristics

**COMMUNITY SURVEY ON ICT USAGE AND E-COMMERCE IN ENTERPRISES**  
**2015**  
**Model Questionnaire version 0.9**

(Questions relating to the Benchmarking Framework 2011-2015 are marked with an asterisk \*)

<b>Module A: Use of computers</b>			
(Scope: all enterprises)			
<b>A1.</b>	<b>Does your enterprise use computers?</b> (Filter question)  Computers include Personal Computers, portable computers, tablets, other portable devices such as Smartphones.	Yes <input type="checkbox"/>	No <input type="checkbox"/> ->go to X1
<b>A2.</b>	<b>How many persons employed use computers for business purposes?</b> <b>- Optional</b>  If you can't provide this value,  <b>Please indicate an estimate of the percentage of the total number of persons employed who use computers for business purposes.</b> <b>- Optional</b>	<div style="border: 1px solid black; width: 150px; height: 30px; margin: 0 auto; display: flex; align-items: center; justify-content: center;"> <span>(Number)</span> </div> <div style="display: flex; align-items: center; justify-content: center; margin-top: 10px;"> <div style="border: 1px solid black; width: 20px; height: 20px; margin-right: 5px;"></div> <div style="border: 1px solid black; width: 20px; height: 20px; margin-right: 5px;"></div> <div style="border: 1px solid black; width: 20px; height: 20px; margin-right: 5px;"></div> <span>%</span> </div>	

<b>Module B: ICT specialists and skills</b>			
(Scope: enterprises with computers)			
<b>B1.</b>	<b>Does your enterprise employ ICT specialists?</b> ICT specialists are employees for whom <b>ICT is the main job</b> . For example, to develop, operate or maintain ICT systems or applications.	Yes <input type="checkbox"/>	No <input type="checkbox"/>
<b>B2.</b>	<b>Did your enterprise provide any type of training to develop ICT related skills of the persons employed, during 2014?</b>	Yes	No
	<b>a) Training for ICT specialists</b> <i>Tick "No" if your enterprise didn't employ ICT specialists during 2014.</i>	<input type="checkbox"/>	<input type="checkbox"/>
	<b>b) Training for other persons employed</b>	<input type="checkbox"/>	<input type="checkbox"/>
<b>B3.</b>	<b>Did your enterprise recruit or try to recruit ICT specialists, during 2014?</b> (Filter question)	Yes <input type="checkbox"/>	No <input type="checkbox"/> ->go to B5
<b>B4.</b>	<b>During 2014, did your enterprise have vacancies for ICT specialists that were difficult to fill?</b>	Yes <input type="checkbox"/>	No <input type="checkbox"/>
<b>B5.</b>	<b>Please indicate who mainly performed the following ICT functions of your enterprise in 2014:</b>	Mainly own employees incl. those employed in parent or affiliate enterprises	Mainly external supplier
	a) Maintenance of ICT infrastructure (servers, computers, printers, networks)	<input type="checkbox"/>	<input type="checkbox"/>
	b) Support for office software (e.g. word processors, spreadsheets, etc.)	<input type="checkbox"/>	<input type="checkbox"/>
	c) Development of business management software/systems	<input type="checkbox"/>	<input type="checkbox"/>

(e.g. <b>ERP</b> - Enterprise Resource planning used to manage resources by sharing information among different functional areas such as accounting, planning, production, marketing; <b>CRM</b> software application for managing information about customers; <b>Human Resources</b> information management, databases)			
d) Support for business management software/systems (e.g. ERP, CRM, HR, databases)	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
e) Development of web solutions (e.g. websites, e-commerce solutions)	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
f) Support for web solutions (e.g. websites, e-commerce solutions)	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
g) Security and data protection (e.g. security testing, security software)	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

<b>Module C: Access and use of the internet</b>							
(Scope: enterprises with computers)							
<b>C1.</b> Does your enterprise have access to the internet? (Filter question)	<table border="0" style="width: 100%;"> <tr> <td style="text-align: center;">Yes <input type="checkbox"/></td> <td style="text-align: center;">No <input type="checkbox"/></td> </tr> <tr> <td></td> <td style="text-align: center;">-&gt;go to <b>E1</b><sup>1</sup></td> </tr> </table>	Yes <input type="checkbox"/>	No <input type="checkbox"/>		->go to <b>E1</b> <sup>1</sup>		
Yes <input type="checkbox"/>	No <input type="checkbox"/>						
	->go to <b>E1</b> <sup>1</sup>						
<b>C2.*<sup>2</sup></b> How many persons employed use computers with access to the internet for business purposes?  If you can't provide this value,  <b>Please indicate an estimate of the percentage of the total number of persons employed who use computers with access to the internet for business purposes.</b>  Computers include Personal Computers, portable computers, tablets, other portable devices such as Smartphones.	<table border="1" style="width: 100%; border-collapse: collapse;"> <tr> <td style="text-align: center; padding: 5px;">(Number)</td> </tr> <tr> <td style="text-align: center; padding: 5px;"> <table border="1" style="display: inline-table; border-collapse: collapse;"> <tr> <td style="width: 20px; height: 20px;"></td> </tr> </table>           %         </td> </tr> </table>	(Number)	<table border="1" style="display: inline-table; border-collapse: collapse;"> <tr> <td style="width: 20px; height: 20px;"></td> </tr> </table> %				
(Number)							
<table border="1" style="display: inline-table; border-collapse: collapse;"> <tr> <td style="width: 20px; height: 20px;"></td> </tr> </table> %							

<b>Use of a fixed broadband connection to the internet for business purposes</b>					
<b>C3.*<sup>3</sup></b> Does your enterprise use DSL or any other type of fixed broadband connection to the internet? (e.g. ADSL, SDSL, VDSL, fiber optics technology (FTTH), cable technology, etc.) (add national examples for public Wi-Fi, WiMax, etc) (Filter question)	<table border="0" style="width: 100%;"> <tr> <td style="text-align: center;">Yes <input type="checkbox"/></td> <td style="text-align: center;">No <input type="checkbox"/></td> </tr> <tr> <td></td> <td style="text-align: center;">-&gt;go to <b>C5</b></td> </tr> </table>	Yes <input type="checkbox"/>	No <input type="checkbox"/>		->go to <b>C5</b>
Yes <input type="checkbox"/>	No <input type="checkbox"/>				
	->go to <b>C5</b>				
<b>C4.</b> What is the maximum contracted download speed of the fastest fixed internet connection of your enterprise? (Tick only one)					
a) less than 2 Mbit/s	<input type="checkbox"/>				
b) at least 2 but less than 10 Mbit/s	<input type="checkbox"/>				
c) at least 10 but less than 30 Mbit/s	<input type="checkbox"/>				
d) at least 30 but less than 100 Mbit/s	<input type="checkbox"/>				
e) at least 100 Mbit/s	<input type="checkbox"/>				

<sup>1</sup> Routing to E1. Module D: Use of cloud computing services is only for enterprises with C1=Yes i.e. enterprises with access to the internet. Module D is optional.

<sup>2</sup> For indicator B10 of the benchmarking framework – annual

<sup>3</sup> For indicator B11 of the benchmarking framework - annual

Use of a mobile connection to the internet for business purposes		
<p>A mobile connection to the internet means the usage of portable devices connecting to the internet through mobile telephone networks for business purposes. Enterprises provide portable devices and pay for all or at least up to a limit, the subscription and the use costs.</p>		
<p><b>C5.</b> *4</p> <p><b>Does your enterprise use a <u>mobile broadband</u> connection to the internet <u>via a portable device</u> using mobile telephone networks (3G or 4G)?</b></p> <p>e.g. via portable computers or other portable devices such as Smartphones</p>	<p>Yes <input type="checkbox"/></p>	<p>No <input type="checkbox"/></p>
<p><b>C6.</b> *5</p> <p><b>Does your enterprise use a <u>mobile broadband</u> connection to the internet via the following <u>portable devices</u>?</b></p> <p><i>- Optional</i></p>	<p>Yes</p>	<p>No</p>
<p>a) via <b>portable computer</b> using mobile telephone networks (3G or 4G) e.g. notebook, netbook, laptop, tablet, etc.</p> <p><i>- Optional</i></p>	<p><input type="checkbox"/></p>	<p><input type="checkbox"/></p>
<p>b) via <b>other portable devices</b> such as Smartphones, using mobile telephone networks (3G or 4G)</p> <p><i>- Optional</i></p>	<p><input type="checkbox"/></p>	<p><input type="checkbox"/></p>
<p><b>C7.</b> *6,*7</p> <p><b>How many persons employed use a <u>portable device</u> provided by the enterprise, that allows internet connection via mobile telephone networks, for business purposes?</b> (e.g. portable computers, tablets or other portable devices such as Smartphones)</p> <p>If you can't provide this value,</p> <p><b>Please indicate an estimate of the percentage of the total number of persons employed who use a <u>portable device</u> provided by the enterprise, that allows internet connection via mobile telephone networks, for business purposes?</b> (e.g. portable computers, tablets or other portable devices such as Smartphones)</p>	<p>(Number)</p> <p><input type="text"/></p> <p><input type="text"/><input type="text"/><input type="text"/> %</p>	
Use of a Website		
<p><b>C8.</b></p> <p><b>Does your enterprise have a Website?</b> (Filter question)</p>	<p>Yes <input type="checkbox"/></p>	<p>No <input type="checkbox"/> -&gt;go to C10</p>
<p><b>C9.</b></p> <p><b>Does the Website have any of the following?</b></p>	<p>Yes</p>	<p>No</p>
a) Description of goods or services, price lists	<input type="checkbox"/>	<input type="checkbox"/>
*8 b) Online ordering or reservation or booking, e.g. shopping cart	<input type="checkbox"/>	<input type="checkbox"/>
c) Possibility for visitors to customise or design online goods or services	<input type="checkbox"/>	<input type="checkbox"/>
d) Tracking or status of orders placed	<input type="checkbox"/>	<input type="checkbox"/>
e) Personalised content in the website for regular/recurrent visitors	<input type="checkbox"/>	<input type="checkbox"/>
f) Links or references to the enterprise's social media profiles	<input type="checkbox"/>	<input type="checkbox"/>
g) A privacy policy statement, a privacy seal or a website safety certificate	<input type="checkbox"/>	<input type="checkbox"/>
<i>- Optional</i>		
h) Advertisement of open job positions or online job application	<input type="checkbox"/>	<input type="checkbox"/>
<i>- Optional</i>		

<sup>4</sup> For indicator B11 of the benchmarking framework - annual

<sup>5</sup> For indicator B11 of the benchmarking framework - annual

<sup>6</sup> For indicator B12 of the benchmarking framework - annual

<sup>7</sup> For indicator B13 of the benchmarking framework - annual

<sup>8</sup> For indicator D7 of the benchmarking framework - annual

Use of Social Media		
Enterprises <b>using</b> social media are considered those that have a user profile, an account or a user licence depending on the requirements and the type of the social media.		
<b>C10. Does your enterprise use any of the following social media? (not solely used for paid adverts)</b> <i>(add national examples; replace existing examples if necessary)</i>	Yes	No
a) Social networks (e.g. Facebook, LinkedIn, Xing, Viadeo, Yammer, etc.)	<input type="checkbox"/>	<input type="checkbox"/>
b) Enterprise's blog or microblogs (e.g. Twitter, Present.ly, etc.)	<input type="checkbox"/>	<input type="checkbox"/>
c) Multimedia content sharing websites (e.g. YouTube, Flickr, Picasa, SlideShare, etc.)	<input type="checkbox"/>	<input type="checkbox"/>
d) Wiki based knowledge sharing tools	<input type="checkbox"/>	<input type="checkbox"/>

**The following question ( C11 ) should only be answered if any of the above social media is used (i.e. C10 has at least one "Yes").**

<b>C11. Does your enterprise use any of the above mentioned social media to:</b>	Yes	No
a) Develop the enterprise's image or market products (e.g. advertising or launching products, etc)	<input type="checkbox"/>	<input type="checkbox"/>
b) Obtain or respond to <u>customer</u> opinions, reviews, questions	<input type="checkbox"/>	<input type="checkbox"/>
c) Involve <u>customers</u> in development or innovation of goods or services	<input type="checkbox"/>	<input type="checkbox"/>
d) Collaborate with <u>business partners</u> (e.g. suppliers, etc.) or <u>other organisations</u> (e.g. public authorities, non governmental organisations, etc.)	<input type="checkbox"/>	<input type="checkbox"/>
e) Recruit employees	<input type="checkbox"/>	<input type="checkbox"/>
f) Exchange views, opinions or knowledge <u>within</u> the enterprise	<input type="checkbox"/>	<input type="checkbox"/>

Other use of the internet		
<b>C12. Do any persons employed have remote access to the enterprise's e-mail system, documents or applications?</b> <i>- Optional</i>	Yes <input type="checkbox"/>	No <input type="checkbox"/>
<b>C13. Does your enterprise pay to advertise on the internet?</b> (e.g. adverts on search engines, on social media, on other websites, etc.) <i>- Optional</i>	Yes <input type="checkbox"/>	No <input type="checkbox"/>

## Module D: Use of cloud computing services

(Scope: enterprises with access to the internet)

**- Optional**

**Cloud computing** refers to **ICT services** that are used **over the internet** to access software, computing power, storage capacity etc.;

**where the services have all of the following characteristics:**

- are delivered from **servers** of service providers
- can be easily **scaled** up or down (e.g. number of users or change of storage capacity)
- can be used **on-demand by the user**, at least after the initial set up (without human interaction with the service provider)
- are **paid** for, either per user, by capacity used, or they are pre-paid

Cloud computing may include connections via Virtual Private Networks (VPN).

<p><b>D1. Does your enterprise buy any cloud computing services used over the internet?</b> (Please refer to the definition of cloud computing above, exclude free of charge services.) (Filter question) <b>- Optional</b></p>	<p>Yes <input type="checkbox"/></p>	<p>No <input type="checkbox"/> -&gt;go to <b>E1</b></p>
<p><b>D2. Does your enterprise buy any of the following cloud computing services used over the internet?</b> (Please refer to the definition of cloud computing above, exclude free of charge services.) <b>- Optional</b></p>	<p>Yes</p>	<p>No</p>
<p>a) E-mail (as a cloud computing service)</p>	<p><input type="checkbox"/></p>	<p><input type="checkbox"/></p>
<p>b) Office software (e.g. word processors, spreadsheets, etc.) (as a cloud computing service)</p>	<p><input type="checkbox"/></p>	<p><input type="checkbox"/></p>
<p>c) Hosting the enterprise's database(s) (as a cloud computing service)</p>	<p><input type="checkbox"/></p>	<p><input type="checkbox"/></p>
<p>d) Storage of files (as a cloud computing service)</p>	<p><input type="checkbox"/></p>	<p><input type="checkbox"/></p>
<p>e) Finance or accounting software applications (as a cloud computing service)</p>	<p><input type="checkbox"/></p>	<p><input type="checkbox"/></p>
<p>f) Customer Relationship Management (CRM, software application for managing information about customers) (as a cloud computing service)</p>	<p><input type="checkbox"/></p>	<p><input type="checkbox"/></p>
<p>g) Computing power to run the enterprise's own software (as a cloud computing service)</p>	<p><input type="checkbox"/></p>	<p><input type="checkbox"/></p>
<p><b>D3. Does your enterprise buy any cloud computing services delivered from:</b> (Please refer to the definition of cloud computing above, exclude free of charge services.) <b>- Optional</b></p>	<p>Yes</p>	<p>No</p>
<p>a) <b>shared servers</b> of service providers</p>	<p><input type="checkbox"/></p>	<p><input type="checkbox"/></p>
<p>b) <b>servers</b> of service providers <b>exclusively reserved for your enterprise</b></p>	<p><input type="checkbox"/></p>	<p><input type="checkbox"/></p>

<b>Module E: Sharing of information electronically within the enterprise</b>			
(Scope: enterprises with computers)			
An ERP (Enterprise Resource Planning) is a software package used to manage resources by sharing information among different functional areas (e.g. accounting, planning, production, marketing, etc.)			
<b>E1. *9</b>	<b>Does your enterprise use an ERP software package?</b>	Yes <input type="checkbox"/>	No <input type="checkbox"/>
CRM (Customer Relationship Management) refers to any software application for managing information about customers			
<b>E2. *10</b>	<b>Does your enterprise use CRM software to manage:</b>	Yes	No
	a) the collection, storing and making available information on customers to various business functions	<input type="checkbox"/>	<input type="checkbox"/>
	(* b) the analysis of information on customers for marketing purposes. (e.g. setting prices, sales promotion, choosing distribution channels, etc.)	<input type="checkbox"/>	<input type="checkbox"/>

<b>Module F: Sharing Supply Chain Management Information electronically</b>			
(Scope: enterprises with computers)			
Sharing information electronically on Supply Chain Management means exchanging all types of information with suppliers and/or customers about the availability, production, development and distribution of goods or services. This information may be exchanged via websites, networks or other means of electronic data transfer, but it excludes manually typed e-mail messages.			
<b>F1.*11</b>	<b>Does your enterprise share supply chain management information electronically with its suppliers or customers?</b> (e.g. information on inventory levels, production plans, planning or progress in the provision of services, demand forecasts or progress of deliveries, etc.). (Filter question)	Yes <input type="checkbox"/>	No <input type="checkbox"/> ->go to G1
<b>F2.</b>	<b>How does your enterprise share supply chain management information electronically?</b>	Yes	No
	a) via websites (yours, those of your business partners) or web portals	<input type="checkbox"/>	<input type="checkbox"/>
	b) via electronic transmission suitable for automated processing (e.g. EDI-type systems, XML, EDIFACT, etc.)	<input type="checkbox"/>	<input type="checkbox"/>

<sup>9</sup> For indicator D1 of the benchmarking framework

<sup>10</sup> For indicator D8 of the benchmarking framework (biennial 2014, included in 2015)

<sup>11</sup> For indicator D4 benchmarking framework (annual)

<b>Module G: ICT Security</b>		
(Scope: enterprises with computers)		
<b>ICT security means:</b> Measures, controls and procedures applied on ICT systems in order to ensure integrity, authenticity, availability and confidentiality of data and systems.		
<b>G1. Does your enterprise have a formally defined ICT security policy?</b>	Yes <input type="checkbox"/>	No <input type="checkbox"/> ->go to H1
<b>G2. Are the following risks addressed in the ICT security policy?</b>	Yes	No
a) Destruction or corruption of data due to attack or by unexpected incident	<input type="checkbox"/>	<input type="checkbox"/>
b) Disclosure of confidential data due to intrusion, pharming, phishing attacks or by accident	<input type="checkbox"/>	<input type="checkbox"/>
c) Unavailability of ICT services due to attack from outside (e.g. Denial of Service attack)	<input type="checkbox"/>	<input type="checkbox"/>
<b>G3. When was your enterprise's ICT security policy defined or most recently reviewed?</b> (e.g. risk assessment, evaluation of ICT security incidents, etc.) (Tick only one)		
<sup>12</sup> a) within the last 12 months	<input type="checkbox"/>	
b) more than 12 months and up to 24 months ago	<input type="checkbox"/>	
c) more than 24 months ago	<input type="checkbox"/>	

<b>Module H: Electronic invoicing</b>				
(Scope: enterprises with computers)				
<b>- Optional</b>				
There are invoices in <b>paper form</b> and <b>electronic form</b> . Invoices in <b>electronic form</b> are of two types: - <b>elInvoices</b> in a standard structure <b>suitable for automated processing</b> . (EDI (e.g. EDIFACT), XML (e.g. UBL), <i>[please add national examples]</i> ). They are exchanged either directly or via service operators or via an electronic banking system. - <b>Invoices</b> in electronic form <b>not suitable for automated processing</b> . (e.g. e-mails, e-mail attachment as pdf, images in TIF, JPEG or other format) <i>If you cannot provide the exact percentages an approximation will suffice.</i>				
<b>H1. Did your enterprise send invoices to other enterprises or public authorities during 2014?</b> (Filter question) <b>- Optional</b>	Yes <input type="checkbox"/>	No <input type="checkbox"/> ->go to H3		
<b>H2. Of all invoices your enterprise sent to other enterprises or public authorities during 2014, what percentage was sent as:</b> <b>- Optional</b>	(%)			
a) elInvoices in a standard structure suitable for automated processing? (EDI (e.g. EDIFACT), XML (e.g. UBL), <i>[please add national examples]</i> )	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	%
b) Invoices in electronic form not suitable for automated processing? (e.g. e-mails, e-mail attachment as pdf, images in TIF, JPEG or other format)	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	%
c) Invoices only in paper form?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	%
<b>TOTAL</b>	<b>1</b>	<b>0</b>	<b>0</b>	<b>%</b>

<sup>12</sup> Formulation in the national questionnaires should correspond to: a) <= 12 months; b) > 12 months and <= 24 months; and c) more than 24 months

<b>15. Which of the following means of payment are accepted for sales via a website or “apps”?</b> <i>-Optional</i>	Yes	No
	<input type="checkbox"/>	<input type="checkbox"/>
	<input type="checkbox"/>	<input type="checkbox"/>

<b>16. Did any of the following obstacles limit or prevent your enterprise from selling via a website or “apps”?</b> <small>(17)</small> <i>-Optional</i>	Yes, I agree	No, I disagree
	<input type="checkbox"/>	<input type="checkbox"/>

<p><b>EDI-type sales</b></p> <p><b>EDI-type sales</b> are sales made via EDI-type messages (EDI: Electronic Data interchange) meaning:</p> <ul style="list-style-type: none"> <li>- in an agreed or standard format suitable for automated processing (e.g. (EDI (e.g. EDIFACT), XML (e.g. UBL), [please add national examples])</li> <li>- without the individual messages being typed manually</li> </ul>		
<b>17. *18</b>	<b>During 2014, did your enterprise receive orders for goods or services placed via EDI-type messages?</b> (Filter question)	Yes <input type="checkbox"/> No <input type="checkbox"/> -> go to I10
<b>18. *19</b>	<b>Please state the value of the turnover resulting from orders received that were placed via EDI-type messages (in monetary terms, excluding VAT), in 2014.</b>  If you can't provide this value,  <b>Please indicate an estimate of the percentage of the total turnover resulting from orders received that were placed via EDI-type messages, in 2014.</b>	(National currency) _____  ___ ___ ___ %
<b>19. *20</b>	<b>In 2014, did your enterprise receive orders placed via EDI-type messages by customers located in the following geographic areas?</b>	
		Yes      No
	a) Own country	<input type="checkbox"/> <input type="checkbox"/>
	b) Other EU countries	<input type="checkbox"/> <input type="checkbox"/>
	c) Rest of the world	<input type="checkbox"/> <input type="checkbox"/>

<sup>17</sup> Please note that respondents go through I6 by responding either "Yes" or "No" to I1

<p style="text-align: center;"><b>COMMUNITY SURVEY ON ICT USAGE AND E-COMMERCE IN ENTERPRISES</b> <b>2015</b> <b>Glossary</b></p>
---

<b>3G, 3<sup>rd</sup> Generation 4G, 4<sup>th</sup> Generation</b>	<p>3G or 3rd Generation, is a family of standards for mobile telecommunications (W-CDMA, CDMA2000, etc) defined by the International Telecommunication Union (ITU). 3G devices allow simultaneous use of speech and data services and higher data transmission rates. Cellular mobile services were initially offered using analogue radio technologies and these were considered as the first generation systems (1G). 2G technology replaced analogue radio networks with digital ones (2G networks) in the 1990's.</p> <p>4G is the fourth generation of cellular wireless standards. It is a successor of the 3G and 2G families of standards. The ITU-R organization specified the International Mobile Telecommunications Advanced requirements for 4G standards, setting peak speed requirements for 4G service at 100 Mbit/s for high mobility communication (such as from trains and cars) and 1 Gbit/s for low mobility communication (such as pedestrians and stationary users).</p> <p>Source: <a href="http://en.wikipedia.org/wiki/">http://en.wikipedia.org/wiki/</a>; <a href="http://www.itu.int">http://www.itu.int</a></p>
<b>App(s)</b>	<p>A mobile app, short for mobile application or just app, is application software designed for a specific purpose (e.g. entertainment, shopping, etc.), downloaded and used on computers depending on their operating system. (e.g. portable devices such as tablets, Smartphones, etc.)</p> <p>Further information: <a href="http://en.wikipedia.org/wiki/Mobile_app">http://en.wikipedia.org/wiki/Mobile_app</a>; <a href="http://www.techopedia.com/definition/2953/mobile-application-mobile-app">http://www.techopedia.com/definition/2953/mobile-application-mobile-app</a></p>
<b>Business process</b>	<p>A business process or business method is a collection of related, structured activities or tasks that produce a specific service or product (serve a particular goal) for a particular customer or customers. Business processes can be of three types: <i>Management processes</i> (e.g. corporate governance, strategic management), <i>Operational processes</i> (e.g. purchasing, manufacturing, marketing and sales etc) and <i>Supporting processes</i> (e.g. accounting, recruitment, technical support etc).</p> <p>Source: <a href="http://en.wikipedia.org/wiki/Business_process">http://en.wikipedia.org/wiki/Business_process</a></p>
<b>Counterfeiting</b>	<p>A counterfeit is an imitation, usually one that is made with the intent of fraudulently passing it off as genuine. Counterfeit products are often produced with the intent to take advantage of the established worth of the imitated product. The word counterfeit frequently describes both the forgeries of currency and documents, as well as the imitations of products or goods (e.g. clothing, software, pharmaceuticals, jeans, watches, electronics, etc.).</p> <p>Source: <a href="http://en.wikipedia.org/wiki/Counterfeiting">http://en.wikipedia.org/wiki/Counterfeiting</a></p>
<b>CRM</b>	<p>Customer Relationship Management (CRM) is a management methodology which places the customer at the centre of the business activity, based in an intensive use of information technologies to collect, integrate, process and analyse information related to the customers.</p> <p>One can distinguish between:</p> <ol style="list-style-type: none"><li>1. Operational CRM – Integration of the front office business processes that are in contact with the customer.</li><li>2. Analytical CRM – Analysis, through data mining, of the information available in the enterprise on its customers. This aims to gather in depth knowledge of the customer and how to answer to its needs.</li></ol>

<b>Data</b>	<p>Representation of facts, concepts, or instructions in a formalized manner suitable for communication, interpretation, or processing by humans or by automated means. Any representations such as characters or analogue quantities to which meaning is or might be assigned.</p> <p>Source: <a href="http://www.its.bldrdoc.gov/projects/devglossary/_data.html">http://www.its.bldrdoc.gov/projects/devglossary/_data.html</a></p>
<b>Denial of service attack</b>	<p>A denial-of-service attack (DoS attack) or distributed denial-of-service attack (DDoS attack) is an attempt to make a computer resource unavailable to its intended users. Although the means to carry out, motives for, and targets of a DoS attack may vary, it generally consists of the concerted efforts of a person or persons to prevent an internet site or service from functioning efficiently or at all, temporarily or indefinitely. Perpetrators of DoS attacks typically target sites or services hosted on high-profile web servers such as banks, credit card payment gateways, and even root name servers.</p> <p>One common method of attack involves saturating the target (victim) machine with external communications requests, such that it cannot respond to legitimate traffic, or responds so slowly as to be rendered effectively unavailable. In general terms, DoS attacks are implemented by either forcing the targeted computer(s) to reset, or consuming its resources so that it can no longer provide its intended service or obstructing the communication media between the intended users and the victim so that they can no longer communicate adequately.</p>
<b>DSL</b>	<p>Digital Subscriber Line (DSL) is a family of technologies that provides digital data transmission over the wires of a local telephone network. DSL is widely understood to mean Asymmetric Digital Subscriber Line (ADSL), the most commonly installed technical varieties of DSL. DSL service is delivered simultaneously with regular telephone on the same telephone line as it uses a higher frequency band that is separated by filtering.</p> <p>Source: <a href="http://en.wikipedia.org/wiki/DSL">http://en.wikipedia.org/wiki/DSL</a></p>
<b>EDI, EDI-type</b>	<p>Electronic Data Interchange (EDI) refers to the structured transmission of data or documents between organizations or enterprises by electronic means. It also refers specifically to a family of standards (EDI-type) and EDI-type messages suitable for automated processing.</p> <p>Source: <a href="http://en.wikipedia.org/wiki/Electronic_Data_Interchange">http://en.wikipedia.org/wiki/Electronic_Data_Interchange</a></p>
<b>EDI e-Commerce</b>	<p>Orders initiated with EDI-type messages. EDI (electronic data interchange) is an e-business tool for exchanging different kinds of business messages. EDI is here used as a generic term for sending or receiving business information in an agreed format suitable for automated processing (e.g. EDIFACT, XML, etc.) and without the individual message being manually typed. "EDI e-Commerce" is limited to EDI messages placing an order.</p> <p>Source: OECD, DSTI/ICCP/IIS(2009)5/FINAL</p>
<b>eInvoice</b>	<p>Electronic invoices comprises payment information exchanged between business parties – enterprises, public authorities - involved in commercial transactions, transmitted via the internet or other electronic means.</p> <p>A structured eInvoice is an invoice where all data are in digital format suitable for automated processing. A distinctive feature of a structured eInvoice is automation: a structured eInvoice will be transferred automatically in inter-company invoicing from the invoice issuer's or service provider's system directly into the recipient's financial or other application.</p> <p>The eInvoice data could be structured according to the XML, EDI or other similar format.</p> <p>Unstructured invoices in an electronic form are not suitable for automated processing (e.g. emails, e-mail attachment as pdf, images in TIF, JPEG or other format)</p>

**Electronic commerce (e-Commerce)**

An e-Commerce transaction is the sale or purchase of goods or services, conducted over computer networks by methods specifically designed for the purpose of receiving or placing of orders. The goods or services are ordered by those methods, but the payment and the ultimate delivery of the goods or services do not have to be conducted online. An e-Commerce transaction can be between enterprises, households, individuals, governments, and other public or private organisations. E-Commerce comprises orders made in Web pages or "apps", extranet or EDI and excludes orders made by telephone calls, facsimile, or manually typed e-mail. The type is defined by the method of making the order.

Source: OECD, DSTI/ICCP/IIS(2009)5/FINAL

**E-mail**

Electronic transmission of messages, including text and attachments, from one computer to another located within or outside of the organisation. This includes electronic mail by internet or other computer networks.

**ERP**

Enterprise Resource Planning (ERP) consists of one or of a set of software applications that integrate information and processes across the several business functions of the enterprise. Typically ERP integrates planning, procurement, sales, marketing, customer relationship, finance and human resources.

ERP software can be customised or package software. These latter are single-vendor, enterprise wide, software packages, but they are built in a modular way allowing enterprises to customise the system to their specific activity implementing only some of those modules.

ERP systems typically have the following characteristics:

1. are designed for client server environment (traditional or web-based);
2. integrate the majority of a business's processes;
3. process a large majority of an organization's transactions;
4. use enterprise-wide database that stores each piece of data only once;
5. allow access to the data in real time.

**Extranet**

A closed network that uses internet protocols to securely share enterprise's information with suppliers, vendors, customers or other businesses partners. It can take the form of a secure extension of an Intranet that allows external users to access some parts of the enterprise's Intranet. It can also be a private part of the enterprise's website, where business partners can navigate after being authenticated in a login page.

**Information**

- 1) Facts, data, or instructions in any medium or form.
- 2) The meaning that a human assigns to data by means of the known conventions used in their representation.

Source: <http://www.its.bldrdoc.gov/projects/devglossary/information.html>

**Internet**

The internet is a global system of interconnected computer networks that use the standard internet Protocol Suite (TCP/IP) to serve billions of users worldwide. It is a network of networks that consists of millions of private, public, academic, business, and government networks of local to global scope that are linked by a broad array of electronic and optical networking technologies. The internet carries a vast array of information resources and services, most notably the inter-linked hypertext documents of the World Wide Web (WWW) and the infrastructure to support electronic mail.

Source: <http://en.wikipedia.org/wiki/internet>

Relates to internet Protocol based networks: www, Extranet over the internet,

EDI over the internet, internet-enabled mobile phones.

<b>Intrusion</b>	<p>An intrusion is an attempt to bypass security controls on a information system. Means of intrusion can be eavesdropping, viruses, worms, trojan horses, logic or time bombs, brute force attacks, etc.</p> <p><i>Intrusion detection</i> is a process with the purpose of detecting intrusions or attempts of intrusions into a computer or network to compromise the confidentiality, integrity or availability by observation of system, application and user activity as well as network traffic. Intrusion detection systems take preventive actions against intrusions without direct human intervention.</p>
<b>Message</b>	<p>Any thought or idea expressed briefly in a plain or secret language, prepared in a form suitable for transmission by any means of communication.</p> <p>Source: <a href="http://www.its.bldrdoc.gov/projects/devglossary/message.html">http://www.its.bldrdoc.gov/projects/devglossary/message.html</a></p>
<b>Mobile broadband</b>	<p>Mobile broadband (Mobile connection to the internet over telephone networks) is the name used to describe various types of wireless high-speed internet access through a portable modem, telephone or other device. (viz. 3G)</p> <p>Source: <a href="http://en.wikipedia.org/wiki/Mobile_broadband">http://en.wikipedia.org/wiki/Mobile_broadband</a></p>
<b>Office (automation) software</b>	<p>Office (automation) software is a generic type of software comprising (grouped together) usually a word processing package, a spreadsheet, presentations' software etc.</p>
<b>Online payment</b>	<p>An online payment is an integrated ordering-payment transaction</p>
<b>Pharming</b>	<p>The term "pharming" connotes an attack to redirect the traffic of a website to another, bogus website in order to acquire sensitive information.</p>
<b>Phishing</b>	<p>Phishing is a criminally fraudulent attempt to acquire sensitive information such as usernames, passwords and credit card details by masquerading as a trustworthy entity in an electronic communication.</p>
<b>Sales via website (web sales)</b>	<p>Web sales are sales made via an online store (web shop), via web forms on a website or extranet, or "apps". Web sales are distinguished from EDI sales. In particular, the type of e-Commerce transaction is defined by the method of making the order. This approach should mitigate the interpretation problems where both types, EDI and Web, are used in the process. An example is a situation where an order is made by the customer through a web application but the information is transmitted to the seller as an EDI-type message. Here the type of selling application is however web; EDI is only a business application to transmit information about the sale. Web sales can be done by mobile phones using an internet browser.</p> <p>Source: OECD, DSTI/ICCP/IIS(2009)5/FINAL</p>
<b>Social media</b>	<p>In the context of the ICT usage survey, the central point of the social media is to establish and maintain social relationships within and around the enterprise. From that aspect we refer to the use of social media (as applications based on internet technology or communication platforms) and the use of Web 2.0 technologies and tools for connecting, conversing and creating content online, with customers, suppliers, or other partners, or within the enterprise. It is not simply the use of Web 2.0 platform (although it is the enabling technology) but the use of social media implies the development of new forms of collaboration and information management within the enterprises as well as helping employees, customers and suppliers to collaborate, to innovate, to share, and to organize knowledge and experiences.</p> <p>The following are the main social media communication platforms and tools for enterprises:</p> <p><b>Social networks or websites</b> are applications based on internet technologies that enable users to connect by creating personal information</p>

profiles, share interest and/or activities, share ideas, invite others to have access to their profile and create communities of people with common interests.

**Blogs:** A blog is a website or a part of a website, that is updated frequently, either owned by individuals, interest groups of individuals or corporate (in the current context it is the blog of the enterprise and not other blogs to which employees contribute). An update (called an entry or a post) is usually quite short and readers can respond, share, comment or link to the entry online. Blogs can be used either within an enterprise (corporate blog) or for communicating with customers, business partners or other organisations.

**Content communities** offer the possibility of sharing media content between users. Photo and video services / Podcasting: A podcast (or non-streamed webcast) is a series of digital media files (either audio or video in various file format e.g. .aiff, .wav, .midi etc for the former and .mov, .avi etc for the latter) that are released episodically. The mode of delivery differentiates podcasting from other means of accessing media files over the internet, such as direct download, or streamed webcasting. Presentation sharing websites offer the possibility to share presentations, documents and professional videos over the internet (share publicly or privately among colleagues, clients, intranets, networks etc). These websites offer the possibility to upload, update and access presentations and/or documents. Very often, presentation sharing websites are linked to blogs and other social networking services or websites.

**Microblogging** refers to the posting of very short updates about oneself. It is in contrast to long-form blogging, where there are usually at least a few hundred words. Microblog posts usually involve a few hundred characters or less. For example, in the context of microblogging services Tweets (Twitter) are text-based posts of up to 140 characters displayed on the user's profile page.

**Wiki:** A wiki is a website that allows the creation and editing of any number of interlinked web pages via a web browser using a simplified markup language or a WYSIWYG text editor. Wikis are typically powered by wiki software and are often used collaboratively by multiple users. Examples include community websites, corporate intranets, and knowledge management systems.

#### **UBL**

Universal Business Language (UBL) is a library of standard electronic XML business documents such as purchase orders and invoices. UBL was developed by an OASIS Technical Committee with participation from a variety of industry data standards organizations. UBL is designed to plug directly into existing business, legal, auditing, and records management practices. It is designed to eliminate the re-keying of data in existing fax- and paper-based business correspondence and provide an entry point into electronic commerce for small and medium-sized businesses.

Source: [http://en.wikipedia.org/wiki/Universal\\_Business\\_Language](http://en.wikipedia.org/wiki/Universal_Business_Language)

#### **Web e-Commerce**

Web (e-commerce) sales are sales made via an online store (web shop), via web forms on a website or extranet, or "apps" regardless of how the web is accessed (computer, laptop, mobile phone etc.)

Source: OECD, DSTI/ICCP/IIS(2009)5/FINAL

#### **Webform**

A webform on a web page allows a user to enter data that is sent to a server for processing. Webforms resemble paper forms because internet users fill out the forms using checkboxes, radio buttons, or text fields. For example, webforms can be used to enter shipping or credit card data to order a product or can be used to retrieve data.

Source: <http://en.wikipedia.org/wiki/Webform>

- Webserver** A Web server is a computer program that delivers (serves) content, such as Web pages, using the Hypertext Transfer Protocol (HTTP), over the World Wide Web. The term Web server can also refer to the computer or virtual machine running the program.
- [http://en.wikipedia.org/wiki/Web\\_server](http://en.wikipedia.org/wiki/Web_server)
- Website** Location on the World Wide Web identified by a Web address. Collection of Web files on a particular subject that includes a beginning file called a home page. Information is encoded with specific languages (Hypertext mark-up language (HTML), XML, Java) readable with a Web browser, like Netscape's Navigator or Microsoft's internet Explorer.
- Wireless access** The use of wireless technologies such as radio-frequency, infrared, microwave, or other types of electromagnetic or acoustic waves, for the last internal link between users devices (such as computers, printers, etc) and a LAN backbone line(s) within the enterprise's working premises. It includes mainly Wi-fi and Bluetooth technologies.
- xDSL** Digital Subscriber Line. DSL technologies are designed to increase bandwidth available over standard copper telephone wires. Includes IDSL, HDSL, SDSL, ADSL, RADSL, VDSL, DSL-Lite.
- XML** The Extensible Markup Language is a markup language for documents containing structured information. Structured information contains both content (words, pictures, etc.) and some indication of what role that content plays (for example, content in a section heading has a different meaning from content in a footnote, which means something different than content in a figure caption or content in a database table, etc.). Almost all documents have some structure. A markup language is a mechanism to identify structures in a document. The XML specification defines a standard way to add markup to documents.
