

SHORT SUMMARY OF CONCLUSIONS

79TH MEETING OF THE SCIENTIFIC REVIEW GROUP ON TRADE IN WILD FAUNA AND FLORA¹

Brussels, 21/06/2017

The SRG took the following decisions² under Articles 4.1(a)(i) and 4.2(a) of Council Regulation (EC) No. 338/97:

1) Negative opinions³ for import of specimens from the following species / countries combinations confirmed / maintained – NOT to be formalised in the Regulation prohibiting the introduction in the EU:

<i>Lamna nasus</i>	Faroe Islands (confirmed)
<i>Lamna nasus</i>	Norway (confirmed)
<i>Brookesia minima</i>	Madagascar (confirmed)
<i>Palleon nasus</i>	Madagascar (confirmed)
<i>Swietenia macrophylla</i>	Brazil (for all permits issued under court order)(confirmed)
<i>Loxodonta africana</i>	Negative opinion for all ecosystems in Tanzania, except the ecosystems for which another opinion is in place

2) Negative opinions³ for import of specimens from the following species / countries combinations confirmed – to be formalised in the Regulation prohibiting the introduction in the EU:

<i>Torgos tracheliotus</i>	South Sudan
----------------------------	-------------

3) No opinion for import of specimens of the following species / countries combinations

Rationale for the "no opinion":

- i) No trade anticipated: The species is not currently (or is only rarely) in trade, and no significant trade in relation to the conservation status of the species is anticipated
- ii) Decision deferred: There are insufficient data on the species.
- iii) All applications to be referred to SRG: The species is not currently (or is only rarely) in trade, but significant trade in relation to the conservation status of the species could be anticipated.

¹ It is understood that the above opinions are also those of each Member State's Scientific Authority and will be reflected in any opinion given in relation to the application of Art. 4.1(a) and 4.2(a) of Regulation 338/97. These opinions will remain valid unless or until circumstances related to the trade or conservation status of the species change significantly

² Unless specifically stated otherwise, all decisions relate to wild specimens.

5) Positive opinion for import of specimens of the following species / countries combinations:

<i>Pericopsis elata</i>	DRC Imports can only be accepted from the 10 companies / 12 forestry concessions for which management inventories were submitted by companies to the DRC forestry administration, corresponding to an overall quota up to 56 201 m ³ (round wood equivalent) for 2016 and for the quota of 41 108 m ³ for 2017.
<i>Varanus rudicollis</i>	Indonesia
<i>Fungia</i> spp.	Indonesia (confirmed)
<i>Varanus niloticus</i>	Sudan
<i>Kinixys zombensis</i>	South Africa
<i>Kinixys natalensis</i>	South Africa
<i>Hippopus hippopus</i>	Federated States of Micronesia (F)
<i>Encephalartos humilis</i>	South Africa D - Captive-bred/artificially propagated (Appendix I) (Maximum diameter of the caudex = 7 cm)
<i>Encephalartos humilis</i>	South Africa A - Artificially propagated plants (Maximum diameter of the caudex = 7 cm)
<i>Loxodonta africana</i>	Tanzania (provided that the following conditions are be met: - Only trophy animals taken from the following 'ecosystems': Serengeti [15], Tarangire- Manyara [10], Katavi-Rukwa [13] and Selous-Mikumi [36])

	<ul style="list-style-type: none"> - quotas allocated at ecosystem level do not exceed >0.3% of managed population, and - trophy animals are male (tusks >20kg or 160cm in length), and - quota reviewed annually and adjusted, as necessary, to take into account most recent population data)
