

**SHORT SUMMARY OF CONCLUSIONS OF THE 69<sup>TH</sup> MEETING OF THE SCIENTIFIC  
REVIEW GROUP ON TRADE IN WILD FAUNA AND FLORA<sup>1</sup>  
3 SEPTEMBER 2014**

The SRG took the following decisions<sup>2</sup> under Articles 4.1(a)(i) and 4.2(a) of Council Regulation (EC) No. 338/97:

**1) Negative opinions<sup>3</sup> for import of specimens from the following species / countries combinations:**

|                               |   |
|-------------------------------|---|
| <i>Panthera leo</i>           | Burkina Faso  |
| <i>Pterocarpus santalinus</i> | India (W, A and I)  |
| <i>Canis lupus</i>            | Serbia (Hunting trophies) (agreed by written procedure on 08/10/14) |

**2) Negative opinions<sup>3</sup> for import of specimens from the following species / countries combinations confirmed / maintained – NOT to be formalised in the Suspensions Regulation:**

|                           |                  |
|---------------------------|------------------|
| <i>Panthera leo</i>       | Benin            |
| <i>Python reticulatus</i> | Vietnam          |
| <i>Anguilla anguilla</i>  | All range states |

**3) Confirmation of current prohibition for introduction in the EU as listed in EU Reg. No. 888/2014**

|                            |  |
|----------------------------|--|
| <i>Canis lupus</i>         | Belarus  |
| <i>Euphyllia cristata</i>  | Indonesia (except maricultured specimens attached to artificial substrates) (for live corals) (agreed on 07/11/14) |
| <i>Euphyllia divisa</i>    | Indonesia (except maricultured specimens attached to artificial substrates) (for live corals) (agreed on 07/11/14) |
| <i>Euphyllia fimbriata</i> | Indonesia (except maricultured specimens attached to artificial substrates) (for live corals) (agreed on 07/11/14) |

<sup>1</sup> It is understood that the above opinions are also those of each Member State's Scientific Authority and will be reflected in any opinion given in relation to the application of Art. 4.1(a) and 4.2(a) of Regulation 338/97. These opinions will remain valid unless or until circumstances related to the trade or conservation status of the species change significantly

<sup>2</sup> Unless specifically stated otherwise, all decisions relate to wild specimens.

<sup>3</sup> Recommendation based on the following guidelines: The species is in trade or is likely to be in trade, and introduction to the Community from the country of origin at current or anticipated levels of trade is likely to have a harmful effect on the conservation status of the species or the extent of the territory occupied by the species.

|-------------------------------|--|
| <i>Euphyllia paraancora</i>   | Indonesia (except maricultured specimens attached to artificial substrates) (for live corals) (agreed on 07/11/14) |
| <i>Euphyllia paradivisa</i>   | Indonesia (except maricultured specimens attached to artificial substrates) (for live corals) (agreed on 07/11/14) |
| <i>Euphyllia yaeyamaensis</i> | Indonesia (except maricultured specimens attached to artificial substrates) (for live corals) (agreed on 07/11/14) |
| <i>Hydnophora microconos</i>  | Indonesia (except maricultured specimens attached to artificial substrates) (agreed on 07/11/14)                   |
| <i>Scolymia vitiensis</i>     | Indonesia (except maricultured specimens attached to artificial substrates) (agreed on 07/11/14)                   |
| <i>Seriatopora stellata</i>   | Indonesia (agreed on 07/11/14)   |

**4) Change of current prohibition for introduction in the EU as listed in EU Reg. No. 888/2014 from species to genus level**

|                      |   |
|----------------------|---|
| <i>Scolymia</i> spp. | Tonga (agreed on 07/11/14) <sup>4</sup> |
|----------------------|---|

**5) No opinion for import of specimens of the following species / countries combinations**

Rationale for the "no opinion":

- i) No trade anticipated: The species is not currently (or is only rarely) in trade, and no significant trade in relation to the conservation status of the species is anticipated
- ii) Decision deferred: There are insufficient data on the species.
- iii) All applications to be referred to SRG: The species is not currently (or is only rarely) in trade, but significant trade in relation to the conservation status of the species could be anticipated.

- 7) ***Anguilla anguilla***: The SRG re-assessed the situation for export of European eels: it was agreed that the situation remained critical and that it was not possible to perform a "non-detriment finding" for the European eels, i.e. that it was not possible for the SRG to advise that the capture or collection of European eel specimens in the wild for their export will not have a harmful effect on the conservation status of the species or on the extent of the territory occupied by the relevant population of the species. The SRG would reassess the situation when significant new information becomes available.
  
- 8) **Corals**: Decisions at genus level reflected in this report cancel and replace previous decisions taken at species level, with the exception of the three genera *Euphyllia*, *Physogyra* and *Plerogyra* for which live specimens need to be identified to species level.
