1. INTRODUCTION

The TARIC consultation screen of the TARIC website contains three tabs: the measure tab, the geographical area tab and the regulation tab. In the TARIC consultation screen the measure tab page is set as the default page.

The measure tab allows searching for a measure. A measure is mainly the application, during a certain period of time, of an aspect of the community tariff and commercial legislation to goods imported from a certain origin or exported to a certain destination.

For example, the third country duty (MFN tariff clause duty) for the yellowfin tunas (code 030232) is 22%. Or the third country duty rate for the fillets (code 03041110) is 18% and the preferential duty rate for the same product for the EEA is 5.40%.

The geographical area tab allows finding a country or a country group. For example, the United States can be found by using the ISO code of the country (US) or by the country name.

The regulation tab allows searching for a regulation by indicating the Official Journal number, the publication date or time span, or the regulation date or time span. A link to the relevant measures is provided and allows to go to the measure tab page with additional criteria and the legal base field pre-filled. A link to eurlex provides the complete text for the regulation in question. For example, it is possible to search for all the regulations published in the Official Journal on 25 March 2010 or all the regulations published between 20 March 2010 and 25 March 2010.

2. REFERENCE DATE

The TARIC website system indicates the current reference date for a query. By default this reference date is the current calendar date.

The reference date is the date whose values you want to see. It shows the measures, regulations and geographical information valid on that date. In order to modify the reference date you must click on "change" after the displayed reference date.

TARIC Consultation

Measure | Geographical area | Regulation

Search for measures

Goods code [browse]

Country of origin/destination

[Additional criteria]

Retrieve Measures

The current reference date for the query is 13-09-2010 [change]

Click on "change" and a pop-up appears. Choose a date and click on "ok" or click twice on the date whose values you want to see or click first on the month and then on the date. To go back to the current date click on "today" and "ok".

13 / 09 / 2010

[Ok]
[Today]

<< 2010 >>
<< September >>

Mo	Tu	We	Th	Fr	Sa	Su
		1	2	3	4	5
6	7	8	9	10	11	12
13	14	15	16	17	18	19
20	21	22	23	24	25	26
27	28	29	30			

If you search for information in the future, the search is based on what is known at the current calendar date. Therefore it is possible that the information looked for can change between now and the future date.

3. LAST UPDATE

The last update provided in the TARIC website gives the last time when the TARIC website was uploaded.

4. SEARCH FOR MEASURES

All the goods to which tariff and commercial measures can be applied must be described and identified. The identification is achieved via a codification system. In the TARIC website goods are coded according to the TARIC nomenclature. The TARIC nomenclature is divided into 21 sections, further subdivided into 97 chapters grouped according to material and use. The TARIC code has 10 digits.

In order to search for measures you need to determine the goods nomenclature code and the origin/destination.

4.1. Goods code

Enter the goods nomenclature code when you know the code. A TARIC goods code consists of a 10-digit TARIC code which includes 6 HS digits (digits 1-6) and 2 CN digits (digits 7-8) as well as the two TARIC digits (digits 9-10).

4.2. Browser

If the goods nomenclature code is not known, the nomenclature browser can be used. The browser allows searching for a goods code from a TARIC nomenclature by providing the descriptions of the goods. To search for the goods code you first have to identify the appropriate section, then the appropriate chapter and lastly the appropriate subheadings for HS, CN and TARIC by choosing the correct goods nomenclature description. The browser intends to provide the same structure as is displayed in the regulation reproducing the complete version of the Combined Nomenclature with rates of duty.

Below you can find two examples of a search for a product by using the nomenclature browser.

4.2.1. Search for husked brown rice

Goods code [browse] Country of origin/destination

0303770010

[Additional criteria]

Retrieve Measures

The current reference date for the query is 10-09-2010 [change]

Since 0303770010 is a declarable code that cannot be broken down the TARIC website system goes back to the starting search page for measures.

4.3. Origin/destination

The country of origin/destination can be selected from the dropdown list that provides all the countries and groups of countries at the reference date. In case of import the country of origin is searched for whereas in case of export the destination is looked for. If no country of origin/destination is chosen and the country of origin/destination field is left empty the TARIC website system automatically provides all possible origins/destinations.

4.3.1. Goods code 0303770010 and the origin the United States

The screenshot displays the 'TARIC Consultation' interface. At the top, there is a navigation bar with the European Commission logo and the text 'Taxation and Customs Union'. Below this, a breadcrumb trail reads 'European Commission > Taxation and Customs Union > Databases > TARIC > Measure'. The main content area is titled 'TARIC Consultation' and features three tabs: 'Measure', 'Geographical area', and 'Regulation'. The 'Measure' tab is active. Below the tabs is a search form with the following fields and elements:

- Goods code**: A text input field containing '0303770010' with a '[browse]' link next to it.
- Country of origin/destination**: A dropdown menu showing 'United States of America - US (0400)'. A callout box points to this dropdown with the text: 'The United States of America is chosen from the dropdown list. Click on "Retrieve Measures" to search for applicable duty rates, restrictions on import/export and other measures.'
- [Additional criteria]**: A text input field.
- Retrieve Measures**: A blue button with a white border.
- The current reference date for the query is 10-09-2010 [change]**: A text label at the bottom of the search form.

Two arrows on the left side of the search form point to the 'Goods code' field and the 'Retrieve Measures' button. A mouse cursor is positioned over the 'Country of origin/destination' dropdown menu.

This icon stands for measures for import.

This icon stands for measures for import and export.

CD590 Fishery products shall only be imported into the Community when accompanied by a catch certificate. Export of catches made by fishing vessels flying the flag of a Member State shall be subject to the validation of a catch certificate by the competent authorities of the flag Member State. Regulation (EC) No 1005/2008.

This only covers marine catches made from 1 January 2010. Products processed from catches obtained before 1 January 2010 do not need to be accompanied by a catch certificate even if they are imported to the EU after 1 January 2010.

Measures for all possible origins/destinations are displayed, sorted by imports/exports, then by alphabetical order of origin/destination, but always starting with Erga Omnes (all origins/destinations), then by measure type: prohibitions, restrictions, tariff measures, etc...

The applicable duty rates, restrictions on import/export and other measures are further explained under "Search for a measure type" (see point 4.4.2.) and "TARIC measure information" (see point 5).

4.4. Additional criteria

On the measure tab page a function called "Additional criteria" can be found. This function includes searches according to a text, a measure, an order number, a legal base, a measure start date. It is possible to do a search using several criteria at the same time.

The screenshot displays the 'TARIC Consultation' web interface. At the top, there is a blue header with the European Commission logo and the text 'Taxation and Customs Union'. Below this, a navigation bar shows 'European Commission > Taxation and Customs Union > Databases > TARIC > Measure'. On the right side of the header, there are links for 'Mail Box | Search', 'Help | What's new? | Information | FAQ', and 'Last update: 01-01-1900'. The main content area is titled 'TARIC Consultation' and features three tabs: 'Measure' (selected), 'Geographical area', and 'Regulation'. Below the tabs is a section titled 'Search for measures' with two input fields: 'Goods code [browse]' and 'Country of origin/destination'. A third field, '[Additional criteria]', is highlighted with a white box and a black border, with a callout box containing the text 'Click on "Additional criteria".' An arrow points to this field from the left. Below the input fields is a 'Retrieve Measures' button. At the bottom of the form, it states 'The current reference date for the query is 16-09-2010 [change]'.

All the words "sea bass" that can be found in the text description of goods nomenclature are displayed. The previous version of the TARIC website only displayed the lines containing "sea bass". In this version, all the nomenclature structure containing these lines is displayed as well for better readability.

4.4.1.1. Multilingual text search

In the TARIC website it is possible to stay on a page in one language but do the search in another language when using the text search criterion.

The main language for the page can be selected by using the dropdown list on the top of the page, which includes 21 official EU languages. The Gaelic and Maltese languages are not in use in the TARIC database.

The search language dropdown list for a text search consists also of a choice of 21 EU languages excluding Gaelic and Maltese.

The main language chosen for the page is English.

TARIC Consultation

Write "sea bass" in German in the "Search text" field and choose German as the search language.

4.4.2. Search for a measure type

Using the measure type criterion shows all the measure types searched for. The measure type is a classification of all possible measures applicable to a declaration. It can be used as a search criterion to narrow down the results. Ex: only show the antidumping duties.

4.4.2.1. Search for additional duties

An additional duty is a duty levied in addition to the third country duty in the context of trade policy measures applied to WTO member countries which impose additional customs duties on products coming from the EU.

The footnotes are used to communicate further information that has to be read by an operator. The footnote CD499 concerns exemptions from these specific countervailing duties and the footnote TM518 gives explanations concerning damaged goods and the duty reductions applied accordingly.

Top

CD499 Imports declared under this Taric Additional Code shall be exempted from the countervailing duties if they are produced and directly exported (i.e. invoiced and shipped) to a company acting as an importer in the Community by the company mentioned in the Taric Additional Code provided that the commercial invoice presented to the relevant customs authorities at the same time as the request for free circulation contains the information listed below :

1. The Undertaking Invoice number.
2. The TARIC additional code under which the goods on the invoice may be customs-cleared at Community borders.
3. The exact description of the goods, including:
 - the product reporting code number (PRC) (as established in the undertaking offered by the producing exporter in question),
 - CN code,
 - quantity (to be given in units).
4. The description of the terms of the sale, including:
 - price per unit,
 - the applicable payment terms,
 - the applicable delivery terms,
 - total discounts and rebates.
5. Name of the company acting as an importer to which the invoice is issued directly by the company.
6. The name of the official of the company that has issued the undertaking invoice and the following signed declaration:
"I, the undersigned, certify that the sale for direct export to the European Community of the goods covered by this invoice is being made within the scope and under the terms of the undertaking offered by [company], and accepted by the European Commission through Decision 2000/745/EC . I declare that the information provided in this invoice is complete and correct."
Exemption from the duties shall further be conditional on the goods declared and presented to customs corresponding precisely to the description on the commercial invoice.

TM518 In cases where goods have been damaged before entry into free circulation and, therefore, the price actually paid or payable is apportioned for the determination of the customs value pursuant to Article 145 of Commission Regulation (EEC) No 2454/93 (OJ L 253, p. 1), the amount of anti-dumping duty and/or countervailing duty, calculated on the basis of the fixed amounts set out above, shall be reduced by a percentage which corresponds to the apportioning of the price actually paid or payable.

4.4.2.4. Search for tariff preferences

Tariff preferences are reduced import duty rates from the MFN duties. The EU has provided tariff preferences in the context of preferential agreements concluded with partner countries and in the framework of GSP.

The screenshot displays the 'TARIC Consultation' interface on the European Commission website. The page header includes the European Commission logo and the title 'Taxation and Customs Union'. The breadcrumb trail reads 'European Commission > Taxation and Customs Union > Databases > TARIC > Measure'. The main content area is titled 'TARIC Consultation' and features a search form with the following fields and options:

- Measure**: A tabbed interface with 'Measure' selected, and other tabs for 'Geographical area' and 'Regulation'.
- Search for measures**: A section header for the search form.
- Goods code**: A text input field containing '1516209880' with a '[browse]' link.
- Country of origin/destination**: A dropdown menu showing 'Mexico - MX'.
- Search text**: A text input field with a language dropdown set to 'en'.
- Measure type**: A dropdown menu showing 'Tariff preference'.
- Order number**: A text input field.
- Legal base**: A text input field with a placeholder '(e.g. R2842/72, D0456/75)'.
- Measure start date**: A date range selector with 'Between' and 'and' fields, and options for '[<]', '[Last week]', and '[Last month]'.
- Retrieve Measures**: A blue button to execute the search.

A text box on the right side of the search form contains the following instructions: 'Choose the goods code 1516209880 for vegetable fats and choose Mexico as a country of origin. Then choose a tariff preference as a measure type and click on "Retrieve measures".'

The page footer indicates 'The current reference date for the query is 27-09-2010 [change]'. The top right corner shows 'Contact | Search | Legal Notice' and 'English (en)'. The bottom right corner shows 'Mail Box | Search' and 'Last update: 12-08-2010'.

4.4.4. Search for an order number

Using the order number criterion provides the relevant goods and measure information related to a tariff quota.

The screenshot displays the 'TARIC Consultation' interface. At the top, there is a navigation bar with the European Commission logo and the text 'Taxation and Customs Union'. Below this, a breadcrumb trail reads 'European Commission > Taxation and Customs Union > Databases > TARIC > Measure'. The main content area is titled 'TARIC Consultation' and contains a search form. The form has three tabs: 'Measure' (selected), 'Geographical area', and 'Regulation'. The search form includes fields for 'Goods code', 'Country of origin/destination', 'Search text', 'Measure type', 'Order number', and 'Legal base'. The 'Order number' field is filled with '092841' and has a white arrow pointing to it. Below the search form is a 'Retrieve Measures' button. A callout box with a black border and white background contains the text: 'Choose the order number 092841. Click on "Retrieve measures".' The page also features a footer with 'Last update: 01-01-1900' and a language selector set to 'English (en)'.

9506 59 -- Other
The limit number of measures is reached. The details of this goods are not displayed.
- Balls, other than golf balls and table-tennis balls
9506 61 -- Lawn-tennis balls
The limit number of measures is reached. The details of this goods are not displayed.
9506 82 -- Inflatable
The limit number of measures is reached. The details of this goods are not displayed.

Not all goods codes with their measures are explicitly displayed since the limit number of measures for the deferred request has been reached.

4.6. Meursing table and additional duties

The EU has developed a Meursing table to calculate additional duties on certain food preparations.

The Meursing table indicates the combination and percentage of four components of a product: milk fat, milk proteins, starch/glucose and sucrose/invert sugar/isoglucose.

On the basis of the four above-mentioned components in a product an additional code is determined. The Meursing additional code type is always 7 and thereto is added a 3-digit Meursing additional code. It is this 3-digit additional code that has to be entered when searching for the amounts of agricultural components and of additional duties imposed on a product.

The additional duties include additional duties on sugar (AD S/Z) and reduced additional duties on sugar (AD S/ZR), additional duties on flour (AD F/M) and reduced additional duties on flour (AD F/MR) as well as the agricultural component (EA) and reduced agricultural component (EAR).

The agricultural component and the additional duties on a product are to be levied at the customs in addition to the third country duties.

Andorra (AD)

→ Tariff preference (01-07-1991 -) : 0 %

Albania (AL)

→ Tariff preference (01-04-2009 -) : 0 %

Bosnia and Herzegovina (BA)

→ Tariff preference (01-07-2008 -) : 0 %

Indicate the values of milk fat, milk proteins, starch/glucose and sucrose/ invert sugar /isoglucose of your product and click on "Calculate".

Goods Composition

Milk fat	Milk proteins	Starch / Glucose	Sucrose / Invert sugar / Isoglucose	
>= 1.5 < 3	>= 2.5 < 6	>= 5 < 25	>= 5 < 30	R2031/01
↑	↑	↑	↑	D0680/90
			<input type="button" value="Calculate"/>	D0332/09
			↑	D0474/08

SECTION IV PREPARED FOODSTUFFS; BEVERAGES, SPIRITS AND VINEGAR; TOBACCO AND MANUFACTURED TOBACCO SUBSTITUTES

CHAPTER 19 PREPARATIONS OF CEREALS, FLOUR, STARCH OR MILK; PASTRYCOOKS' PRODUCTS

1905 Bread, pastry, cakes, biscuits and other bakers' wares, whether or not containing cocoa; communion wafers, empty cachets of a kind suitable for pharmaceutical use, sealing wafers, rice paper and similar products

- Sweet biscuits; waffles and wafers

1905 31 - - Sweet biscuits

- - - Completely or partially coated or covered with chocolate or other preparations containing cocoa

- - - Other

1905 31 30 - - - - Containing 8 % or more by weight of milkfats

- - - - Other

1905 31 91 - - - - Sandwich biscuits

1905 31 99 - - - - Other

Additional Code:

ERGA OMNES (ERGA OMNES)

→ Third country duty (01-01-2005 -) : **9.00 % + EA(1) MAX 24.20 % + ADSZ(1)** R2031/01
9.00 % + 36.54 EUR/100kg MAX 24.20 % + 10.06 EUR/100kg

Andorra (AD)

→ Tariff preference (01-07-1991 -) : **0 %** D0680/90

Albania (AL)

→ Tariff preference (01-04-2009 -) : **0 %** D0332/09

Bosnia and Herzegovina (BA)

→ Tariff preference (01-07-2008 -) : **0 %** D0474/08

Now you can find the additional duties as well as the additional code for your product.

In this case the third country duty for the product is 9% and the agricultural component is 36.54 EUR /100kg plus the additional duty on sugar is 10.06 EUR /100 kg.

The Meursing additional code for the indicated values of the four components is 126.

5. TARIC MEASURE INFORMATION

After specifying the goods nomenclature code and the country of origin/destination the relevant measures can be searched for. If searching for a specific measure for a certain goods code and for a certain country it is possible to use the measure type criterion search under additional criteria (see point 4.4.2.).

The icon "arrow pointing to the right" stands for a measure of import whereas the icon "arrow pointing to the left" means export. The icon with two arrows – one pointing to the left and the other one pointing to the right – stands for measures for import and export.

BTI Consultation

BTI Consultation

You can launch a request by selecting a specific country, BTI reference, validity date, keyword, nomenclature code or description.

Issuing country:
 BTI Reference:
 Start date of validity (DD/MM/YYYY): [change] to [change]
 End date of validity (DD/MM/YYYY): [change] to [change]
 Issued since (DD/MM/YYYY): [change]
 Nomenclature code: from to
 Keyword:
 Description *:
 Sort By:

The binding tariff information consultation page is displayed.

***Textual search tips**

Enter a string present in the BTI. A string is a word or a part of a sentence, e.g. "fruit", "plums", "sour cherries", "table cherries". Do not enter the quotation marks (""). To search information based on part of a word, use the percentage sign (%) as a wildcard character. For example, a search for "%fruit" finds all BTIs in which words such as "fruit", "grapefruit", "kiwifruit", "jackfruit" appear.

List of strings can be entered. Separate the strings by AND to retrieve BTIs where they all appear. Separate the strings by OR to retrieve BTIs where at least one string appears.

6. SEARCH FOR GEOGRAPHICAL AREAS

A country can be found by indicating its ISO code or the name of the country. The result of the geographical query always indicates the country ISO code, the country name, all the possible country groups to which it belongs, and the geonomenclature code. The geonomenclature code is only used for reference.

6.1. Search by an ISO code or by a country name

European Commission
Taxation and Customs Union

European Commission > Taxation and Customs Union > Databases > TARIC > Geographical area

Enter the ISO code "NO" and click on "Search".

Measure Geographical area Regulation

7. SEARCH FOR REGULATIONS

A regulation can be found by using three criteria: the Official Journal number, the publication date or time span or the regulation date or time span. The regulation information provided includes the regulation identifier (code and year), the regulation type, the regulation start date, the regulation end date, the publication date of the regulation, the journal number and the journal page. A link to measures, and when relevant, a link to eurlex are provided.

7.1. Search by the Official Journal number

Entering the Official Journal number displays all the regulations falling under this criterion.

The screenshot shows the 'TARIC Consultation' search interface. At the top, there is a navigation bar with the European Commission logo and the text 'Taxation and Customs Union'. Below this, a breadcrumb trail reads 'European Commission > Taxation and Customs Union > Databases > TARIC > Regulation'. The main content area is titled 'TARIC Consultation' and features three tabs: 'Measure', 'Geographical area', and 'Regulation'. The 'Regulation' tab is selected. Below the tabs, there is a search form with the following fields:

- Official journal:** A text input field containing 'L148' with a placeholder '(e.g. L 59, L 148)'. An arrow points to this field.
- Publication date:** A 'Between' range selector with two empty input fields and options for '[<] [Last week] [Last month]'.
- Regulation date:** A 'Between' range selector with two empty input fields and options for '[<] [Last week] [Last month]'.

A 'Search' button is located below the date fields, with an arrow pointing to it. A text box above the search form contains the instruction: 'Enter the OJ number L148 and click on "Search"'. At the bottom of the form, it states: 'The current reference date for the query is 16-09-2010 [change]'. The top right of the page includes links for 'Contact | Search | Legal Notice | English (en)', a 'Mail Box | Search' button, and a 'Last update: 01-01-1900' timestamp.
