## Social Science Aspects of Fisheries for the 21<sup>st</sup> Century

MARIE Skłodowska-CURIE ACTIONS  
European Training Network (ETN)

2015-2018

This project has received funding from the European Union's Horizon 2020 Framework Programme Marie Skłodowska-Curie (MSC) - ITN - ETN programme (project 642080)

# Understanding Socio-Ecological Systems

Modelling

Interdisciplinarity

Governance

Human Geography

Political ontologies

Visualizations

Statistical analysis

Social simulation

Literacy

- Involved in writing EU proposals
- Close collaboration with EcoFishMan, MareFrame, FoodIntegrity, ClimeFish, Authent-Net and FarFish

ETNs help build bridges between EU projects!  
Encourage more ERC and SC cooperation

## What the project discovered

- Fisheries models are not properly documented
- The human dimension of fisheries is seldom included
- Social aspects of fisheries (e.g. trust, compliance) are modeled through economic (e.g. profit) and environmental (e.g. stock size) variables

## What remains to be discovered

- Good ways to integrate social and ecological perspectives in models
- How to measure good governance
- Interactive ways to visualize fisheries data
