Series 8B, 8D, 8F

Rule No.	Check	Severity
1	For all NACE codes, aggregation checks on : Total=M21+M22 (In case the Total is delivered) M22=M221+M222	Error

2. Inter series comparison

Inter Annex 8 - General check on comparison of the correct series

8A-8B For all NACE codes

Total 8A= Total 8B= SUM (M21+M22) 8B (differences of 2% allowed)

8C-8D For all NACE codes

Total 8C= Total 8D= SUM (M21+M22) 8D (differences of 2% allowed)

8E-8F For all NACE codes

Total 8E= Total 8F= SUM (M21+M22) 8F (differences of 2% allow

Comparison with 1B - General check on comparison of the correct series

Rule for all NACE codes: Total turnover should equal to turnover of enterprises with more than 20 persons employed in 1B. Differences of 2% are allowed.

For 8A, 8C and 8E Total = SUM size classes 20-49, 50-249 and 250+ in 1B (differences of 2% allowed)

For 8B, 8D and 8F Sum of M21 and M22 = SUM size classes 20-49, 50-249 and 250+ in 1B (differences of 2% allowed)
