# Manual

Treatment of canteen items in the DET

1. INTRODUCTION

For the BH "11.11.12.1 Canteens" no price collection is foreseen. We use an approach taking reference items from the BHs "11.11.11.1 Restaurants services whatever the type of establishment" and "11.11.11.2 Pubs, bars, cafes, tea rooms and the like".

2. CANTEEN ITEMS IN YOUR FINAL COUNTRY LIST

The canteen items are contained in your final country list like normal items. You can add canteen items from other group lists to your list. **But don't forget to add also the source item to your country list.** If you add a canteen item without its source item, you will get problems in the DET. You can find the code of the source item in the description of the canteen item.

3. REFERENCE ITEMS

Commission européenne, L-2920 Luxembourg. Telephone: (352) 43 01-30148.

http://epp.eurostat.ec.europa.eu

As you can see the screen for the canteens reference items looks different as for the other items. The item description just refers to the source item. Except of "Finalise" all buttons have been removed. A new button "Include Item" has been introduced. The price grid has not been removed but it is not possible to type in data there.

Eurostat recommends start working on the canteen items after you finished your intra country validation. Please go through the list of canteens items and check if the items could be used as a reference. If yes click on **Include Item**. All prices from the source item will be copied to the reference item.

As you see, the prices from the source item appear in the price grid and the "Include Item" button changes to "Exclude Item". Please don't forget to define the representativity, as it is not copied from the source item. If you want to remove the prices, just click on **Exclude Item**. All prices will be removed and the representativity will be undefined.

It is not possible to do any changes to the price data in the reference item. But all changes in the price grid and the comments field of the source item will be

automatically copied to the reference item. In this case a finalised reference item will be unfinalised. Please find the example below.

Finalised reference item:

Obs No	Flag	Month	Shop Type	Shop Identifier	Observed Price	Observed ... in portion	Comments	Price Collector	Other	Price	Price Ratio
1	O	10 7		4	2.90	1.00				2.90	0.84
2	O	10 7		3	3.00	1.00				3.00	0.87
3	O	10 7		8	3.30	1.00				3.30	0.96
4	O	10 7		9	3.40	1.00				3.40	0.98
5	O	10 7		1	3.50	1.00				3.50	1.01
6	O	10 7		7	3.50	1.00				3.50	1.01
7	O	10 7		6	3.60	1.00				3.60	1.04
8	O	10 7		5	3.90	1.00				3.90	1.13
9	O	10 7		2	4.00	1.00				4.00	1.16

Item comments   Comments for local use

Changes in the source item:

| Obs No	Flag	Month	Shop Type	Shop Identifier	Observed Price	Observed ... in portion	Comments	Price Collector	Other	Price	Price Ratio
1	E	10 7		4	2.90	1.00				2.90	
2	O	10 7		3	3.00	1.00				3.00	0.88
3	O	10 7		8	3.30	1.00				3.30	0.97
4	O	10 7		9	3.40	1.00				3.40	1.00
5	O	10 7		1	3.50	1.00				3.50	1.03
6	O	10 7		7	3.50	1.00				3.50	1.03
7	O	10 7		6	3.60	1.00				3.60	1.06
8	O	10 7		5	3.50	1.00				3.50	1.03
9	E	10 7		2	4.00	1.00				4.00	

Item comments

Finalise   Exclude Item

Item comments
Outliers have been removed or corrected.

Comments for local use

Hence, after making changes to the source item, the reference item will need to be finalised again.

4. DIFFERENCES IN PRICE COLLECTORS MODE

In the Price Collectors Mode the reference items for canteens are visible, but the price collector is not able to enter any data and the "Include Item" button is not available. If you export a SUA file in price collector mode we recommend to remove the BH Canteens (DET Manual page 6).
